TESSCO TECHNOLOGIES®

Your® Total Source

Delivering

what you need, when and where you need it!

Network Infrastructure

Antennas & Antenna Systems
- Antennas, Base Station
- Antennas, Cellular & PCS
- Antennas, Microwave
- Antennas, Indoor (Cellular/SMR/PCS)
- Filters, Combiners, Duplexers, Ferrites
- Towertop Amplifiers

Transmission Line & Cable
- Coaxial Cable & Transmission Line
- Waveguide, Connectors & Accessories
- Braided Coaxial Cables
- Connectors for Transmission Line
- Connectors & Adapters for Braided Coax
- Jumper Assemblies
- Coax Cable & Transmission Line Accessories
- Dehydrator Systems

Tower & Site Support
- Mounts, Base Antenna
- Site Hardware
- Shelter Cable Support Systems
- Equipment Racks
- Enclosures, Indoor/Outdoor
- Lightning Protectors & Air Terminals
- Grounding Systems
- Exothermic Ground Connections
- Power Supplies, Rack Mounted
- Power Supplies, Tabletop
- Battery Backup Systems, Site
- Solar Power Products
- Towers

Telco Interface & In-Building Support
- Surge Protection, Battery Backups, UPS
- Network Cables
- Fiber Optic Cable & Components
- Premise Wiring Supplies
- Security Products
- Network Interfaces

Wireless Broadband
- Access Control Devices
- Mesh Networks
- In-Building Wireless LAN
- Broadband Wireless Access
- Free Space Optics
- Unlicensed T-Carrier
- Unlicensed Ethernet
- Licensed, Point to Point
- In-Building Phone Systems
- Amplifiers, Base Station & Repeater
- In-Building Amplifiers, Repeaters
- SCADA Spread Spectrum Receivers
- Telemetry

Mobile Devices & Accessories

Phone Accessories
- Accessories by Phone Type
- Data Interfaces, PCMCIA Modems
- Hands-Free, Car Kits, & Headsets
- Batteries, Transportable
- Cases & Belt Clips
- Antennas, Portable Cellular
- Transportable Antennas
- Display Materials

Two-Way Radios & Accessories
- Radios, Two-Way
- Encoders, Decoders, & ANI Systems
- Voice Encryption Modules
- Microphones
- Batteries, Two-Way Portable
- Chargers & Conditioners, Two-Way
- Battery Analyzers & Conditioners
- Cases, Two-Way Portable
- Headsets, Two-Way Portable
- Telephone Interconnect & Remote Control
- Speakers, Public Address
- Mobile RF Amplifiers
- Voltage Inverters & Converters
- Auto Security

Data, Messaging & Location Systems
- Hand-held Computer Accessories
- Bar Code Scanner
- Vehicle Tracking Systems

Antennas, Mounts & Vehicle Equipment
- Antennas, Mobile Two-Way, GPS, XM
- Antennas, Portable Two-Way
- Antennas, Mobile PCS & Dual Band
- Antennas, Mobile Cellular
- Mounts, Mobile Antenna
- Vehicle Mounts, Radios & Data Terminals
- Vehicle Mounts, Wireless Phone
- Light Bars & Sirens

How can TESSCO help you do business better? The answer is in the next 12 pages.

The 28,000 products in this guide

are only half the story.

Your Total Source

The TESSCO team consists of experts in wireless engineering, product development, customer service, technical support, IT, e-commerce, logistics, marketing, credit and financing and more, available 24 hours a day, 7 days a week.

Product + Knowledge

TESSCO's experts bring you unprecedented KNOWLEDGE. These experienced professionals have spent years working in the field and solving every conceivable wireless and supply chain challenge. This intelligence and hands-on experience give TESSCO the ability to CONFIGURE and DELIVER the perfect products for your needs and keep you in CONTROL of your purchases, inventory and bottom line.

What you need:

Knowledge. The wireless industry is a complicated, moving target. New applications and products are introduced every day. You need a single source to help you sort out everything from industry trends to the subtle difference between two seemingly identical products.

What we can provide:

To make sure we have the correct – and best – products you need to build, maintain, run or use a wireless system, we have gathered a group of experts with unequaled KNOWLEDGE of the wireless industry. These experts constantly source, test and add product, specifications and comparisons to TESSCO's Product Knowledge and availability system. This valuable knowledge is available in this TESSCO® *Solutions Guide*, and augmented and supported, on the phone, in the field, and online at TESSCO.com.® News and updates come to you via the *Transmitter*® and *The Wireless Journal*® and in a variety of specialty digital and print publications. TESSCO offers a variety of training seminars and after-sales technical, training and installation support.

The bottom line?

TESSCO's brainpower transforms a massive amount of information and data into usable and user-friendly knowledge for you to make fast optimum decisions.

Knowledge

Choice comparison
Comprehensive online and print versions eliminate supplier catalogs and are organized by product, not manufacturer. Supported by engineering and technical staff.

Product & delivery pricing system
Calculate total delivered costs up front.

Integrated product labeling & packing lists
Clear, consistent labels, bar-codes, packing lists and purchase orders help organize and simplify.

After-sale technical, training & installation support

Risk-free trial and full warranty support

Your Total Source

"To drive productivity in the field, site or store, you need your products ready for immediate use…not a bag of parts. That's configuration."

Product + Configuration

What you need:

A choice of products and brands – the "best of breed." But it's more than that. You need an end-to-end solution. You need customized configurations tailored for you. And you need them to arrive ready to be put into use. You need things the way you need them.

Network Infrastructure: integrating the base site logistics.
From RF propagation to fixed wireless broadband transceivers and controllers to in and out of building site support components, we have everything you need from end to end. And the most comprehensive brand choices.

Mobile Devices & Accessories: keeping wireless users on the air.
From two-way radios to surveillance solutions and the latest portable messaging devices, we have everything you need to keep users on the air. TESSCO offers a wide choice of two-way radios, accessories and mounting solutions; the broadest selection of wireless phone accessories and the latest in data, messaging and location systems.

Installation, Testing & Maintenance: keeping engineers and technicians productive.
From base station testing to microwave links, we have everything you need to install, test, maintain and fix wireless systems and hardware. TESSCO has everything you think of, and everything you don't…all your testing equipment, tools and shop supplies are available from *Your Total Source*®.

What we can provide:

Not only do we have 28,000 products in inventory, but we can also CONFIGURE the product combination that works best to achieve your goals. TESSCO specializes in giving you a complete solution for immediate use. TESSCO's experts can work with you to customize each order the way you need it, specifically for the project you have at hand. Whether you need an infrastructure site kit, a consumer-oriented merchandising display or web site, or a test bench or a tool kit, we can make sure that you get everything the way you need it. Whether your business specializes in establishing wireless networks, installing wireless voice data and Internet systems, security and remote monitoring, vehicle tracking, mobile phone accessory sales or mobile phone repair, we will make sure you're getting the right package for your individual needs.

The bottom line?

TESSCO product choices and inventory allow you to build, customize and kit solutions for immediate use.

Configuration

Bill-of-materials "worksheet"
Engineering specifications and services. A customizable selection of stocked in-depth items and service capabilities.

End-to-end solutions
A complete solution with services for site kitting, logistics management, consumer merchandising and customized toolkits.

Kitted & configured
A comprehensive inventory delivered how you need it, with customized packaging.

Value-added services
Ready for immediate use, installation or resale with tuning, installation, assembly, personalized web sites, sales hotlines, packaging and merchandising displays.

Virtual inventory
Invest only when you are ready by buying what you need, when you need it.

Your Total Source

"It's hard to balance having product ready when you need it versus excess inventory sitting on shelves. At TESSCO we deliver exactly what you need – in one complete package – exactly WHEN you need it. Not a day before or a day after."

Product + Delivery

What you need:

A secure wireless broadband access network, a box of Velcro, an integrated mobile two-way system, a phone accessory for a customer tomorrow, a tower build-out, a workshop, a thousand handset faceplates, an antenna at the last minute or anything in between. And you need them delivered somewhere in a very specific way at a very specific date and time. A complete order that arrives too early can be as useless as an incomplete order delivered too late.

What we can provide:

There is a difference between shipping and DELIVERY. To TESSCO, delivering means meeting your objectives and your time frames. Whether you need something delivered to your customer's site, your store, your hotel, or to ten different locations at different times, TESSCO will get it there. Whether you need 10 batteries and two chargers or 10 reels of cable and two antennas, TESSCO will get it there. To do this we rely upon the collective experience of our team members, and an in-depth knowledge of the challenging transportation and logistics needs of the wireless industry.

Whether you need something urgently or as part of a planned project, we can deliver within the parameters that you establish. We will GUARANTEE your products are where you need them when you need them. It's part of knowing our industry and your challenges, then developing a system that optimizes your company's performance. Only TESSCO can offer a solution that meets your comprehensive needs.

The bottom line?

TESSCO delivers your complete configured solution, on time – not a day early and not a day late – to your point of use or sale from our in-depth inventories.

Delivery

Availability confirmation
Confirm availability and configuration of orders.

Delivery confirmation
Confirm time and total delivered costs. Track delivery status 24/7 online.

Where and when you need it
Just-in-time delivery, where you need it. Customized local delivery to depot, multi-sites, store or customer.

Speed to market
A single delivery for every order with custom packaging and configuration.

Performance and Delivery Guarantee
Complete, on-time, error- and damage-free delivery and product performance.

Your Total Source

TESSCO's system gives you control of purchasing, transactions, inventory and performance – with tailored programs that make sense for you.

Product + Control

What you need:

You need to be in control. But how you define control is different from how others do. For a large wireless retailer it means the ability to have a seamless transition from delivery to replenishment, for a tower contractor it means having the exact amount of steel available at all times without sitting on tons of inventory, and for a wireless provider it means equipping 100 installation teams from coast to coast with every broadband product they need in one day. You also need to track products, ordering trends, overhead costs and much more.

What we can provide:

This is where TESSCO shines. We have customizable supply chain solutions to meet your particular needs. Partnering with TESSCO puts you in control of your procurement, inventories, assets and costs. TESSCO can give you centralized control and decentralized ordering and delivery. You determine the parameters – who can buy how much of what – and TESSCO's system ensures that your policies will keep you in control. Pricing, order tracking, inventory control, asset tracking, and disbursement are all simplified by the TESSCO system. Plus, TESSCO can create ways for you to be on top of your business at all times. We can create custom reports that can break down your big picture into as many small pictures as you need.

The bottom line?

TESSCO provides control at every step of the procurement process with a closed loop system across manufacturers and transactions.

Control

Consistent pricing across manufacturers
Upfront, consistent pricing organized by product, not manufacturer.

Authorization control
Reserve availability, price and delivery.
Centrally control multi-site purchasing with pre-approved, customized parameters.

Order delivery tracking
One PO leads to one delivery, one packing list and one invoice.

Property and usage tracking and history
Control your capital with customized accounting, item usage, property records.

Financing options
Credit and leasing programs.

Product + Supply Chain

What you need:

You need to consider the cost of every part of your supply chain, including sourcing, purchasing, receiving, staging, handling, accounting, extra costs for lack of availability, percent of inventory that actually gets consumed, used or sold, your inventory costs and more. You need to increase the percent of time you have complete, on-time delivery, and reduce your total capital investment, inventory costs, and total operating costs – while improving your productivity.

What we can provide:

TESSCO's Knowledge, Configuration, Delivery & Control (KCDC™) system can greatly simplify your supply chain. That's the whole story. Forget about juggling multiple suppliers, multiple warehouses and multiple sites. Forget about high facilities costs to stage and warehouse product. TESSCO can dramatically improve your business and bottom line – and give you more control over your operations.

TESSCO is the leading provider of wireless product and service solutions, encompassing the entire wireless industry, including voice, data, messaging, location tracking and Internet systems.

TESSCO as *Your Total Source*® will provide an integrated Product + Supply Chain Solution for your company and as a result you will achieve:

Complete on-time delivery. We always have the inventory that you need. We ship it around the globe every day. With 28,000 wireless products and a guaranteed delivery system, you can be assured of having what you need when and where you need it.

Reduced inventory investment, carry costs and write-offs. TESSCO can eliminate the logistics tangle of multiple suppliers, multiple warehouses, multiple order points and multiple points of use. Inventory sitting on your shelves is a liability, not an asset. TESSCO reduces your inventory risks.

Lower total operating costs. Product price is just one component of total costs. Supply chain costs, facilities costs, carrying costs and write-offs all add up to your total operating costs. The TESSCO system focuses on lowering the sum total of all these costs.

The bottom line?

Your bottom line: TESSCO's experts can work with you to provide you an integrated Product + Supply Chain Solution that will decrease your capital investments while increasing your availability and improving your profitability.

How cost effective is your product availability supply chain?

A. Total throughput:
$_____ [product consumed/used/sold]

B. Total capital investment:
$_____ [inventory plus facilities]
Total capital investment as percent of throughput [A]:
_____%

C. Total write offs:
$_____ [inventory loss, damage, obsolescence]
Total write-offs as percent of throughput [A]:
_____%

D. Total inventory carrying costs:
$_____
Total carrying costs as percent of throughput [A]:
_____%

E. Total extra cost for product delays:
$_____
Total extra costs as percent of throughput [A]:
_____%

F. Total operating costs:
$_____ [sourcing, purchasing, receiving, staging, handling, accounting, freight, etc.]
Total operating costs as percent of throughput [A]:
_____%

G. Total costs as percent of throughput [A]:
_____%
[B+C+D+E+F]

H. Product availability:
_____%
[Percent of time product was NOT delivered complete and on time.]
TESSCO can lower your total costs as percent of your throughput [G] and provide increased complete on time deliveries [H].

Your® Total Source

A simple way of doing business better.®

What we can provide:

TESSCO provides an easy, performance and delivery based transaction and procurement system. Our role is delivering what you need when and where you need it. As a result, our pricing system combines the total cost for the configuration, delivery and control of each order. Bottom line order delivered cost of your order is the same regardless of order entry method...phone, fax, mail, or TESSCO.com®

Your Total Source® pricing.

The more you use TESSCO, the lower your product pricing. TESSCO's unique pricing program saves over multi-manufacturer direct best price shopping...and will allow you to buy just what is needed! You don't have to buy any product in bulk to get a low cost on every product.

The total of the list price value of all invoices, including delivery charges, in a given month establishes your pricing tier. Once you have qualified for a given tier, your prices are locked in for the rest of the month, and the entire next month...regardless of order size, type of product or brand. As an industry professional maintaining your own wireless system, your tiers are determined as follows:

- Total purchases at list price exceeds $200, you receive T1 pricing
- Greater than $1,000, you receive T2 pricing
- Greater than $2,400, you receive T3 pricing

Guaranteed performance and delivery.

Each order arrives:

- Complete – and configured for immediate use.
- On time – not before and not after the date you specify. If not delivered as promised at time of order, all performance and delivery guarantee (PDG) charges are waived.
- Damage free – TESSCO is responsible for the protection against damage or loss in transit. Should there be a loss or damage, note on shipper's bill of lading or refuse the shipment, and TESSCO will replace the lost or damaged item.
- Error free – should there be an error, items are replaced immediately at no additional cost to you. (Replacement items are automatically invoiced, and then credited when erroneously shipped items are returned.)
- TESSCO honors all manufacturer warranties.

No-risk 30 day inspection.

Not sure which brand or model you need? We'll deliver multiple items and allow you to return what you don't need. Return the item, freight paid, in original condition and product packaging within 30 days and receive account credit.

Performance and Delivery Guarantee charges (PDG).

PDG charges are based on the following, regardless of the point of delivery within the continental United States:

- Total sum of all items to be delivered (shown in this Guide)
- Delivery time required

Confirmed upfront total delivered costs.

At the time of your order or "worksheet reservation," you receive confirmation of items to be configured and delivered, date of delivery, and the bottom line – the delivered cost. Your delivery will be re-confirmed by fax or email and can be tracked on TESSCO.com.® Should extended delivery of some items be required, the total order PDG charge is prorated according to individual delivery weights.

Flexible financing alternatives.

Improve cash flow, extend credit and conserve bank lines for working capital with TESSCO payment programs.

- Open terms credit and financing
- Joint purchase order program to use customer's credit
- Credit card payments
- TESSCO® MasterCard® with deferred billing
- Dealer and reseller financing
- Enhanced credit capacity
- Test equipment rental program
- Equipment leasing program
- EFT (electronic fund transfer) option

Orders with Bulk Items Minimum Charge	$ 160.00	$ 130.00	$ 100.00

Bulk Orders have bulk items which require delivery by LTL. A bulk item is defined as being greater than:

- 150lbs in weight or
- 108" in length
- 130" in girth (1xLength + 2xWidth + 2xHeight)

Additional days for delivery and additional charges may be assessed for out-of-delivery areas, dimensional weight requirements, hazardous materials, drop shipments and lift gate services. We cannot guarantee on-time delivery in the event of extreme weather conditions or acts of God.

A **World-Class** Choice from *TESSCO*

WIRELESS SOLUTIONS®, a leading provider of aftermarket accessories, offers you wireless accessories for all of your top phones, accessory sales systems, and supply chain solutions designed to increase sales, reduce inventories, and lower your total costs. The WIRELESS SOLUTIONS line features products compatible with Nokia, Sony Ericsson, Motorola, Audiovox, Kyocera, Samsung and LG.

Please call **800-472-7373** or visit **TESSCO.com** for the latest pricing and innovative new products.

Your Total Source

TESSCO's Solutions Library illustrates thirty-five wireless applications familiar to wireless professionals.

Use the Solutions Library to navigate the book more quickly, plan your projects, speed product selection, jog your memory, assemble complete orders and avoid rush orders for forgotten items. The Solutions Library is useful in all these ways:

- As quick navigation through the tabs of the book. Page references provide fast access to the comparative product information you need to assemble the best materials to meet your budget and assure great performance.
- As a project-planning tool and visual checklist to remind you of project requirements and to avoid rush orders for forgotten items later on.
- As training graphics for your employees or customers.

Solutions Applications by Product Group

Infrastructure

1. Cable for Towers
2. Monopole / Colocation

TESSCO
TECHNOLOGIES®

Financing Solutions Go Way Beyond Open Terms

TESSCO's financing is collaborative, flexible and specific to your unique business needs. We're committed to providing timely and sufficient financing to minimize interruption in flow of products and services to you!

Open Terms

Our credit-granting process is simple and timely!

NEW!
TESSCO Extended Payment Terms

Take advantage of your good credit history to leverage your short-term financing needs.

- Available terms of 3, 6, 9 or 12 months
- Low fixed-interest rates
- Ability to budget fixed monthly payments
- Keeps existing lines of credit free
- Quick turnaround time

Joint Purchase Order Program

Increase your business credit capacity by leveraging your customer's credit-worthiness to secure a higher credit line for bigger purchases. Your customer issues a joint purchase order to both you and TESSCO, using TESSCO's remittance address. Your customer pays TESSCO directly, and you will be reimbursed within 24 hours. Your margin and your customer relationship are protected.

TESSCO® Platinum MasterCard

Receive deferred billing on all TESSCO purchases charged to your TESSCO® Platinum MasterCard. To learn more about many great benefits, click on **www.tessco.com/account/credit/mastercard** and mail your completed application to Business Lending Processing Center, PO Box 15973, Wilmington, DE 19885-5973.

Equipment Leasing Program

Balancing your company's cash flow can be a lot easier through leasing. Get financial flexibility and conserve bank lines for working capital, really important now for small- and medium-sized businesses. TESSCO offers a full range of leasing

options with fast turnaround time, easy documentation, competitive rates, and affordable monthly payments! Contact **410-229-1176** or **leasing@tessco.com.**

Dealer & Reseller Financing

- End-of-the-month invoicing
- Escrow agreement for major deals
- Net 60 PO financing for special projects
- Third-party financing...it's your deal, but we take the credit risk, invoice your customer, and collect.
- Third-party leasing for reseller's customers

Enhanced Credit Capacity

Grow your business with the help of your personal credit. If your business is new and your business credit is not yet established, TESSCO will extend credit to your business through your personal guarantee.

3-Payment Plan, No Interest for 90 Days

Purchase equipment with three equal payments with the TESSCO® Platinum MasterCard.

Rental

TESSCO has broad offerings of test equipment available for established customers to satisfy short-term equipment needs.

EFT (Electronic Fund Transfer)

Simply provide pertinent bank information and your transaction will be processed by fast, efficient and secure electronic payment. You can also initiate EFT by completing our brief online form.

Bank Letter Of Credit

A letter of credit from a financial institution is accepted for purchases with special conditions agreed to by all parties.

Credit Card

TESSCO accepts credit cards, including American Express, Discover Card, MasterCard, and Visa.

Contact our financing experts at ct@tessco.com or call 410-229-1395

What is a Hot Spot?

A "Hot Spot" is a public location that is equipped with a commercial system that allows the general public to gain broadband access to the Internet using a Laptop or PDA. Hot Spots can be both wired and wireless at locations such as:

- Hotels
- Airports
- Shopping Malls
- Public Retail Locations
- Coffee Houses
- Convention Centers
- Any other venue that the laptop-carrying public may be!

You own the...

SITE MASTER TRAINING COURSE

Specialized Site Master line sweep training

is an intense two-day instructor led training course that focuses on RF line sweep theory and technology

- **Hands-on:** Learn by doing the task and not by watching. 50% of the course is hands-on.
- **Critical Emphasis:** Fine-tune the points, or products and techniques of particular importance to your operations. Our skilled instructors and staff will tailor the module to meet your requirements.
- **Cost Savings:** Eliminate or significantly reduce your travel expenses because training sessions are offered in a location close to you.
- **Schedule:** Training sessions can be easily scheduled months in advance. Get more specific details regarding class locations, including information on discounts or having a training session at your company site by contacting TESSCO at (800) 472-7373

Who should attend Site Master line sweep training?

- Wireless Carriers
- Base Station OEMs
- Tower Companies
- Field Engineers
- Installers
- Site Managers

You will learn

- Technical aspects of line sweeping
- How to set up line sweep
- The affect that cable length, cable type, and system components have on sweeps
- The affects of sweep rates and frequencies
- How to pinpoint faults
- How to identify, locate, document, and resolve cellular/PCS cable—transmission line faults

"Overall, this course is excellent and I would recommend it, even to folks who have been performing site sweeps as part of their responsibilities in the past. There were many features about the software that I didn't know how to use until I took the course."-Scott Collins, Nextel

Call 800-472-7373 to enroll and master the art of line sweeping.

From home offices to corporate offices, CSI has your in-building wireless needs covered.

New Products

Small Office/Home Office Solution
Model 150 PCS Bi-directional Amplifier – Featuring 50 dB of gain and covering the entire PCS frequency range, the 150 is the perfect solution for small office/home office installations.

Large Facility Solution
Model 610 Bi-directional Amplifier – With 80 dB of gain and nearly two watts of linear output power, the 610 is a high-performance BDA ideal for applications requiring high gain due to low outside signal strength and for driving extensive coaxial systems.

With over 7,500 amplifier units sold, CSI has become a leading provider of technologies that effectively extend wireless signals in all types of facilities. From small offices to multi-story commercial facilities, and everything in between, we're experts at providing high performance products and services that define a new level of value in the wireless industry.

Wherever you need to enhance in-building wireless communications, count on CSI products to cover you.

Turn to the manufacturers index for a complete list of CSI products or call your TESSCO distributor for more information.

When 802.11b isn't enough. And leased lines are too expensive.

{ Think Quick. }

New Tsunami QuickBridge. The fastest, easiest way to building-to-building connectivity.

Tsunami QuickBridge™ is the newest member of Proxim's line of high-performance Ethernet bridges. With aggregate speeds up to 60 Mbps, it's a cost-effective alternative to leased lines and more powerful than 802.11b connections. It provides secure, carrier-class connectivity between buildings up to six miles apart with 99.999% availability. Plus it can be installed in just hours, not days. QuickBridge comes with everything you need in one box—including two radio units with integrated antennas, cables, mounting hardware, and all of the necessary documentation. It even comes equipped with a special audible alignment tool to make installation even easier. To learn more about Tsunami QuickBridge, go to **www.TESSCO.com** or call **800-472-7373**.

navtrak

How would your business change...

...if you could ride with your mobile employees all day, every day?

- Increase Productivity
- Control Overtime
- Improve Customer Service
- Increase Security
- Lower Operating Costs
- Improve Response Time
- Protect Vehicles from Theft
- Lower Insurance Premiums
- Increase Profitability

Get Navtrak.

Navtrak offers innovative, affordable solutions to businesses with a mobile workforce.

Get Connected to the Latest Technology in Mobile Computing

TESSCO Part No. 462316

Panasonic Toughbook 28 Docking Station

Gamber-Johnson's NEW Panasonic Toughbook 28 Docking Station is designed to securely mount the computer into fleet vehicles. Features include:

- Patent-pending, rugged design using MIL-STD-810F test procedures
- Brass locating pins ensure proper computer placement
- Pre-drilled holes provide cable strain relief and align with Gamber-Johnson motion attachments
- One-handed motion lever, cam slide mechanism, and floating docking connector all offer simple and assured docking engagement
- Built to handle the strongest Panasonic Toughbook applications

NotePad™ IV Universal Computer Mount

TESSCO Part No. 455320

The NEW NotePad™ IV is loaded with great new features that will make mounting your laptop computers quick and easy. Features include:

- Patent-pending slim rugged design provides low mounting capability
- New, curved hold-down clips
  - are "one-size-fits-all", work with most computers
  - feature easy height adjustment capability
  - are fastened on the interior and do not hang below chassis
- Offset front retainer and rear support brackets for added forward/backward restraint
- Wing turn compression closure latch
  - allows for fast initial size adjustment
  - allows for quick computer insertion and removal
  - has built-in key lock

Introducing!

MAXRAD®
STATE OF THE ART ANTENNAS

MAXRAD's MICHELANGELO™ ANTENNAS

In-Building Antenna Products

- 800/900 MHz frequencies, including SMR, iDEN, AMPS, GSM, ISM
- PCS, 2.4 GHz and 5.8 GHz ISM frequencies
- Omnidirectional, bi-directional hallway and directional models available
- Attractive, low-profile designs
- Above ceiling tile mounting bracket available for applications requiring no visibility
- Outstanding, consistent and repeatable performance
- UL listed materials and cable meet the most stringent building codes

WISPerformance

- Antenna Solutions for Wireless Internet Service Providers
- Directional panel antennas, sector panel antenna, directional yagi antenna and accessories
- 2400-2500 MHz ISM frequencies
- Attractive and robust low profile UV stable mounting brackets for outdoor installations
- Best cost vs. performance antenna products in the industry

MAXRAD's XtremeWave™ ANTENNAS

Xtreme Efficiency (XE) All Terrain Sectorized Omnidirectional Antenna

- Increased wireless broadband system capacity, gain and throughput achieved through individually fed sectors
- Up to 15° mechanical downtilt
- Up to 11 different azimuth patterns options for customized wireless coverage (kits required)
- Mast or direct tower leg mounting for maximum flexibility
- Minimal downtime reductions through individually fed sectors
- ISOMAX maximum isolation sectorized antenna array also available!

Become an Instant Hot Spot Provider

Become a Hot Spot provider with Airpath's turn-key 'Instant Hot Spot' program. Out-source your NOC infrastructure and begin immediately!

- AAA End-User Billing
- Branding
- Roaming Agreements/Settlement
- Subscriber Management
- Login/Signup/Advertising Portals
- Productizing/Pricing
- Help Desk

What is a Hot Spot?

A "Hot Spot" is a public location that is equipped with a commercial system that allows the general public to gain broadband access to the Internet using a Laptop or PDA. Hot Spots can be both wired and wireless at locations such as:

- Hotels
- Airports
- Shopping Malls
- Public Retail Locations
- Coffee Houses
- Convention Centers
- Any other venue that the laptop-carrying public may be!

You own the... ...Network ...Brand ...End User

You own the revenue!

Multiplier

Multiplier Industries Corp.
An ISO 9001 Certified Company

NEW!
RECHARGEABLE BATTERIES

Manufacturer of over 2,000 standard and custom batteries for wireless applications. Multiplier offers an extensive line of rechargeable NiCd, NiMH & Li-Ion batteries. Proudly made in U.S.A.

For M/A-COM EDACS 300P Radios
- Highest performing Ni-Cd Cells
- Intrinsically Safe models available
- 1100 & 1500 mAh capacities

For Kenwood TK-3140 Radios
- Highest performing Ni-Cd, Ni-MH & Li-Ion Cells
- 1200, 1400 & 2000 mAh capacities

For M/A-COM Panther/Cougar 400P, 600P, 625P Radios
- Highest performing Ni-Cd & Ni-MH Cells
- 1100 & 1450 mAh capacities

For M/A-COM Jaguar 700P Radios
- Highest performing Ni-Cd & Ni-MH Cells
- Intrinsically Safe models available
- 1700 & 2700 mAh capacities

a **World-Class** Choice from ***TESSCO***

Toss the tip. Keep the heater. Count the savings.

A new design that saves you money.

When the tip wears out on some popular soldering irons, the entire heater/tip cartridge must be replaced, even though the heater has months of useful life remaining. Very wasteful. And very expensive.

With a radically different design that integrates the heater into the handle, the new WMP micro pencil provides an extremely short tip-to-grip distance. But the real news is that when the tip wears out, you replace only the tip. So your operating costs can decrease by as much as 70%! Ask your Weller sales representative for a demonstration soon and start counting your savings.

New from Times Microwave Systems!

Off-White Colored Jacket for LMR® Low-Loss Flexible Coaxial Cables

LMR-195-FR-W • LMR-400-FR-W

- Perfect for in-building and outdoor short to medium length antenna feeder cable runs
- Off-white jacket blends in with light colored building exteriors and most indoor office décor color schemes
- Easy-attachment "EZ" non-solder connectors available
- Fire-retardant overall jacket
- UL/CSA Listed CMR/MPR (PCC-FT4)

FlexRAD-600-PVC Flexible Radiating Cable

- Provides controlled RF coverage in buildings, mines and other enclosed areas where point source antennas are not practical
- Offers broadband performance up to 2.5GHz
- Flexible, non-kinking design provides easier installations
- Accepts standard "EZ" crimp connectors used for LMR-600 cable
- Low cost design

EZ-600-NMC-2 Two-Piece Type N Male Connector for LMR-600

- Simple 2 piece clamp design
- Eliminates the need for a crimp tool and dies
- Non-solder "EZ" spring finger center conductor contact
- Compatible with the Times ST-600C strip/prep tool
- Low loss & low VSWR design through ISM and spread spectrum bands to 5.8 GHz

Global Lightning Solutions

GX Series (Patent Pending)

The PolyPhaser GX series is designed for systems requiring dc voltage and up to 50 watts maximum continuous power, including in-line amplifiers and Global Positioning Systems (GPS) receivers.

SX Series (Patented Technology)

A unique and compact design is only one of the features of the SX series from PolyPhaser. It is a dc-blocked maintenance-free protector that incorporates a fully integrated weatherized housing.

- DSX Series: 800 MHz-2.7GHz
- PSX Series: 1.2 GHz-2.8 GHz
- LSX Series: 4.2 GHz-6.0 GHz

Both Series Feature:

- Industry's Best Surge Performance
- Low Insertion and Return Loss
- Multi-Strike Capability

SINCLAIR

We have you covered.

INTRODUCING THE NEW

480 Omni Series

806 MHz to 896 MHz High Performance Omni Antenna Series

Sinclair Technologies offers a large family of High Performance Omnidirectional Antennas providing maximum coverage for cellular AMPS, CDMA, TDMA, SMR, Public Safety and Paging networks.

A wide range of antenna patterns is available, offering RF coverage optimized for many different topographies including towns, highway corridors, both flat and mountainous areas, and coastal or border regions.

The SC481, a member of the High Performance Omni family, is specifically designed to provide coverage for cities, towns and highways. The higher gain of the SC481 is complemented by its lower VSWR and low intermod operation. The Parallel Feed design allows for better pattern control and high null fill.

Fabricated using rugged components, these antennas are designed for ease of installation and superior resistance to harsh environmental conditions. The antennas are enclosed in fiberglass radomes to minimize tip deflection and coverage variations in severe wind conditions. For extreme weather conditions, heavy duty fiberglass radomes are available. The antennas are available with a variety of industry standard connectors and are designed to meet the most stringent wind and ice loading requirements.

30-50 MHz, Ground Plane, Coaxial [340-17]

Manufacturer Table	Sinclair SRL-101C	Antenna Specialists ASP636	Decibel Products DB201	Decibel Products DB205
				
Product Narrative	Rugged antenna designed for severe weather conditions. Driven element at ground potential & ground rods are sand damped to reduce vibration. Specify Frequency*	1/4 wave, ground plane antenna has high power cabability. Omnidirectional. Field tunable.	Heavy-duty, folded monopole ground plane antenna. Omni directional. Can be mounted to the tower top, pole or building. Field Tunable	Coaxial, 1/2-wave dipole antenna Withstands rough handling. No radials required. Omnidirectional Field tunable.

Antennas, Base Station

Radiall/Larsen BSA45C	Cushcraft/Signals BR Series	Cushcraft/Signals CRS Series	Manufacturer Table	Decibel Products DB212-2
			**30-50 MHz, Dipole [340-19]**	Economical omnidirectional base antenna. Consists of a mobile antenna on a Kulrod plated, stainless steel radial kit. Field tunable.	Heavy duty omnidirectional "Ringo". Halfwave, end fed. No radial design. Base section is double thickness seamless tubing. Field tunable.	2 dB gain "Rugged Ringo". Halfwave, end fed, omnidirectional. No radial design allows top or side mounting. Field tunable.	Product Narrative	Dual element, side mount antenna. 2.5dB/ 5.0dB gain. Has fewer problems with lightning and static than top mounted antennas. Specify frequency.*

Antennas, Base Station

66-88 MHz, Yagi/ Corner Reflector [340-28]

	Decibel Products DB286	Maxrad, Inc MYA723K	Decibel Products DB230	Maxrad, Inc MYA725K
				Product Narrative	Two 3 element yagi antennas phased together to produce 10dB gain. Can be mounted to the top or side of a tower. Ideal for point-to-point applications. Specify frequency.*	3 element directional yagi. Element mounting holes are threaded to provide positive lock and RF connection. Field tunable.	Broad directional, 3 element yagi antenna. Can be mounted to the top or side of a tower or wood pole. Orientation not critical since gain in broad. Field tunable.	5 element directional yagi. Element mounting holes are threaded to provide positive lock and RF connection. Field tunable.

Sinclair SRL-201	Antenna Specialists ASPA244	Cushcraft/Signals CRS150	Antenna Specialists ASP2011	Maxrad, Inc MBR1503
				
Field tunable, rugged, wideband, omnidirectional groung plane antenna. Aluminum construction used throughout for strength and durability.	Heavy duty, coaxial halfwave antenna. Field tunable Omnidirectional. Low angle of radiation allows for maximum system range.	2 dB gain "Rugged Ringo". Field tunable. May be mounted on any vertical tubular support up to 1-1/4" diameter.	Economically priced collinear, general service antenna. Omnidirectional. Field tunable. Simple U-bolt mounting.	Fully enclosed coaxial feed design offers maximum performance. Radials are 3/8"aluminum. Includes heavy duty cast aluminum mount. Field tunable.

VHF, Dipole [340-33]

Manufacturer Table	Sinclair SRL-210C-2	Decibel Products DB220	RFS Celwave 1121	Sinclair SRL-235
				
Product Narrative	Single Dipole antenna with 1/2 wave element to mast spacing resulting in bi-directional pattern. Cable harness is inside mast and dipole booms. Extra-wide bandwidth ideal for multicoupled systems.	Single element, dipole antenna. 2.5dB gain offset pattern. Can be mounted on the top or side of a tower.	Single exposed dipole antenna. 3dB offset pattern. Solid aluminum rod radiators eliminate moisture accumulation. Support mast not included.	Twin dipole antenna provides wid bandwidth and field changable 3dB omni or 5.5dB bidirectional gain pattern.

Antennas, Base Station

Sinclair SRL-301	Decibel Products DB201	Maxrad, Inc MBS Series	Antenna Specialists ASPR659 Series	Cushcraft/Signals CR450 Series
				
ightweight, unity gain antenna cov-rs 20 Mhz without adjustment. Can be stocked for reuse. Includes umper and N male connector.	Heavy duty, lightweight ground plane suitable for mounting on top of tower, pole or building. Omnidirectional. Unity gain.	Base matched, 1/2 wave with a no ground plane design. Easily field tuned. Aluminum construction. Omnidirectional.	Economy collinear antenna. 2dB gain. Utilizes precisely phased 5/8 wave radiators for peak performance with radials. Easy to install.	Broadband 2 dB gain "Ringo" Half-wave antenna fed with a matching section featuring a ring inductor. No tuning needed.

CSI Cellular Specialties, Inc.
Wavelink is a subsidiary of CSI
For optimum performance, CSI now offers a complete line of antennas.

Power Dividers and Combiners

These standard coaxial dividers/combiners are offered in various configurations covering full octave bands to 2.0 GHz. These units are ideally suited for use in Cellular and PCS base stations. Standard units have N female terminations, can handle 10 watts of power and provides 20dB of isolation between ports.

MECA Dual Band Power Dividers

MECA introduces the dual band (800-2000 MHz) "V-Line" isolated power divider/combiners in 2 way through 8 way. SMA and N Female terminations are available. These compact units are ideally suited for your value applications where high performance and reliability must be achieved through low cost.

Andrew Power Dividers

Andrew Power Dividers allow two antennas to be fed from one transmitter with equal or unequal power division as required. The units are air dielectric, have 7/8" EIA flanges, and are designed for operation over 2.1- 2.686 Ghz band with 1.1 maximum input VSWR.

806-960 MHz Fiberglass/Omni Antennas [342-44]

Manufacturer Table	RFS Celwave 1610	Sinclair SRL-433	Maxrad, Inc MFB8135 Series	Comtelco BS800XL5-C
Type	Fiberglass	Fiberglass	Fiberglass	Fiberglass
Product Narrative	Omnidirectional, fiberglass has minimal wind resistance and is ideal for repeater control stations.	Antenna offers moderate 4 dB gain for use in paging and data systems where omnidirectional coverage is required, or additional power handling is needed.	Low cost, fiberglass radome enclosed base antenna. Aluminum mounting base. Omnidirectional.	Fiberglass base station antenna. Elements are fully encapsulated in foam to provide structural integrity and protection from moisture.

conomical fiberglass enclosed mnidirectional antenna. Gold nodized support pipe. Order ount separately.	Omni Mirage antenna. Fiberglass Horizon Blue radome. Unique dipole radiator. Tested in absence of IM generators. Drain plugs at both ends.	6 dB, fiberglass antenna has Minimum Tip Deflection design and horizon blue radome. Dual and triple versions available. Drain plugs at both ends.	These center fed collinear antennas ensure consistent gain and impedance across the operating fequency band and are specifically designed to meet various onmidirectional requirements for mobile radio services in the 806-960 Mhz bands.	Dual 6 dB antennas in one horizon blue radome. 40 dB isolation between antennas. Ideal for saving space on a tower. Drain plugs at both ends.

Product Narrative	Omnidirectional, fiberglass ant. Minimum Tip Deflection design. Horizon blue radome provides for minimum tip deflection. Drain plugs at both ends. 6 deg. downtilt.	Omnidirectional, fiberglass. 35 MHz bandwidth ideal for trunking transmitor receive applications.	Omni aluminum alloy antenna with fiberglass radome. Features length of antenna four channel extrusion, brass feedlines, non-collinear air insulated system for all radiating elements.	Omnidirectional, fiberglass antenn 10 dB gain. Broadbanded and extremely rugged. Built in 2 degre of downtilt.

gle panel antenna. 62 degree pat-n is not effected by the tower. dome protects the radiating ele-nts.	Single panel antenna. 120 degree pattern is not effected by the tower. Radome protects the radiating elements.	120 degree directional panel antenna. Electrically & mechanically designed to offer the best trade-off between size vs. windload & high front to back ratio.	TRIPLE 105 deg. directional panel antenna. Features three antennas in one radome, reducing the space occupied on a tower site.	105 degree directional panel antenna. Electrically & mechanically designed to offer the best trade-off between size vs. windload & high front to back ratio.

Type	Panel	Panel	Panel	Panel
Product Narrative	High performance broadband panel antenna, excellent for SMR or Cellular applications.	Vertically polarized panel antenna with best intermodulation performance on the market. Highest gain for size and beamwidth. Air dielectric delivers best S/N ratio and call quality.	These CELlite antennas are designed for applications in the AMPS, NAMPS, TACS, ETACS, NMT, and GSM cellular radio systems in the 824 to 960 MHz frequency band	Sector panel aluminum alloy antenna with fiberglass radome. Features length of antenna four channel extrusion, brass feedline non-collinear air insulated system for all radiating elements.

Type	Panel	Panel	Panel	Panel
Product Narrative	CELlite 65 degree, lightweight, directional antenna designed for low wind loading and low intermod susceptibility. 16dB gain.	45 degree directional panel antenna. Electrically & mechanically designed to offer the best trade-off between size vs. windload & high front to back ratio.	Sector panel aluminum alloy antenna with fiberglass radome. Features length of antenna four channel extrusion, brass feedlines, non-collinear air insulated system for all radiating elements.	Small, lightweight Mini-Panel antenna that is only 6-1/4" wide an 2.75" thick. A great choice for visu ally sensitive sights.

Periodic	Panel/Log Periodic	Enclosed Dipole Array	Directional	Directional
Director" log periodic antennas high quality, lightweight and vide an unmatched front to ratio of 40 dB.	The Celwave Maximizer series is a log periodic dipole array which uses a patent pending design to achieve a front-to-back ratio of 45 dB, the highest front-to-back ratio in the industry. Maximizers are available to cover ESMR, AMPS, PCS and DCS frequency ranges.	1/4 wave dipole spacing gives these antennas a offset radiation pattern. 10 dB gain. Radiators housed within a durable ABS radome	105 degree directional antenna designed for AMPS platforms. Radiating elements enclosed in radome attached to aluminum back screen.	190 degree sector antenna. Center-fed design, enclosed in Aeroglas radome. Antenna is mounted at the apex of a reverse 90 deg. open grid back screen.

Omni aluminum alloy antenna with reflector and fiberglass radome. Features length of antenna four channel extrusion, brass feedlines, non-collinear air insulated system for all radiating elements.	The Celwave Optimizer is a log periodic dipole antenna with continuosly adjustable electrical downtilt. This antenna features a patented CELlite technology, which eliminates cables and soldered joints, often the cause of reduced system perfomance due to potential long-term IM issues.	"dB Director" log periodic antenna with adjustable electrical downtilt. 40 dB front to back ratio.	ZoneMaster GEN3VPOL Log Periodic antenna with adjustable Vertical Beam Tilt	Sector panel aluminum alloy antenna with fiberglass radome. Directional	Log Periodic	Directional	Log Periodic	Log Periodic
Omni aluminum alloy antenna with reflector and fiberglass radome. Features length of antenna four channel extrusion, brass feedlines, non-collinear air insulated system for all radiating elements.	"dB Director" log periodic antennas are high quality, lightweight and provide an unmatched front to back ratio of 40 dB. Null fill & upper lobe supression.	Omni aluminum alloy antenna with reflector and fiberglass radome. Features length of antenna four channel extrusion, brass feedlines, non-collinear air insulated system for all radiating elements.	95 Degree log periodic sector antenna. Ideally suited for rough conditions and extreme weather conditions. Robust mechanical design is so precise that no tuning or adjustments are required.	Log periodic sector antenna. Broadbanded. Ideally suited for rough conditions and extreme weather.

				rner Reflector	Corner Reflector	Enclosed Radiator Yagi	7-Element Yagi	7-Element Yagi
gle corner reflector. 9 dB direc-nal gain. High, 25 dB front-to-k ratio reduces interference.	Rugged, broadband corner reflector is an excellent antenna for multicoupling several systems or for use with widely spaced duplex frequencies.	9 element yagi. Director element enclosed in radome for protection from the environment. Also available a two stack version.	7 element yagi. 10 dB directional gain. Heavy duty welded elements with Txylan protective coating. Clamps fit 1.5- 2.5" mast.	7 element. Permits vertical or horizontal polarization. Radome covering director element reduces ice build up.

806-896 MHz Dual-Polarized Antennas [342-48]

	tron Wireless Tech. 0-10H Series	RFS Celwave 10108D	Sinclair SRL-460	Antel International BCDHV-87077
Manufacturer	Element Yagi	Dual Stack Yagi	Parabolic Reflector	Dual Polarized Fiberglass Antenna
Product Narrative	element yagi. 12dB gain.No tun- required. "Ever Sealed" feed is ervious to moisture, ice & harsh ironments. Heavy duty con- uction.	2 stack, 9 element yagis. Two radiating elements each radome enclosed. May be horizontally or vertically polarized. Broadband for cellular or trunking.	Broadband parabolic cylinder reflector with a dipole reflector assembly, backfiring primary radiator.	Omni aluminum alloy antenna with fiberglass radome. Features length of antenna four channel extrusion, brass feedlines, non-collinear air insulated system for all radiating elements.

Polarized	Dual Polarity Panel	Panel/Polarization Diversity	Dual Polarized
rsity Master dual polarized na. Two antennas in a single . Use in duplexed system or DB858H90E-SX single panel in duplexed site.	Diversity Master dual polarized antenna. Two antennas, one vertically & one horizontally polarized enclosed in a single panel.	The APX866515 polarization diversity antenna is ideal for sites where zoning issues demand the use of a more aesthetically pleasing solution. By utilizing polarization diversity instead of space diversity they combine two antennas under one radome with some loss of system performance depending on the RF environment.	Diversity Master dual polarized antenna. Two antennas, one vertically & one horizontally polarized enclosed in a single panel.

Type	Fiberglass	Omnidirectional	Fiberglass	Fiberglass
Product Narrative	Omnidirectional, fiberglass ant. Minimum Tip Deflection design. Horizon Blue radome Minimum Tip Deflection. Drain plugs at both ends. 6 Degree electrical downtilt.	These center-fed collinear antennas ensure consistent gain and impedance across the operating frequency band and are specifically designed to meet various omnidirectional requirements for mobile radio services in the 806 -960 MHz bands.	Omnidirectional, fiberglass. 35 MHz bandwidth ideal for trunking transmit or receive applications.	Omnidirectional, fiberglass poly thane painted radome with alum num/brass design. Brass feed lin utilize air insulation for virtually signal loss.

	Enclosed Dipole Array	Adjustable Dipole Array	Panel	Cellular/GSM,Trunking/SMR Panel Antenna
egree directional panel na. Electrically & mechanically ed to offer the best trade off en size vs. windload & high to back ratio.	Highly versatile, broadband antennas are well suited to systems where a specific coverage pattern is required. Radiators housed within durable ABS radome.	Enclosed dipole array antenna with a adjustable reflector assembly allows horizontal pattern to be changed from 60 to 160 degrees.	120 degree directional panel antenna. Electrically & mechanically designed to offer the best trade off between size vs. windload & high front to back ratio.	These 37 degree directional panel antennas are designed for low density, three sector AMPS/TACS/ GSM cell sites.The wide bandwidth allows for thier use for Tx, Rx & Full Duplex applications.

Product Narrative	Omnidirectional, fiberglass antenna. 6 dB gain. For PCS/PCN applications. Available with 7/16 DIN connector.	Omnidirectional, fiberglass antenna. 6 dB gain. For PCS/PCN applications. DIN female termination is on the end of a 300mm lead.	Omnidirectional, fiberglass antenna. 6 dB gain. For PCS/PCN applications. Direct 7/16 DIN female term.	Omnidirectional Base Station Antenna. U.V. stable, pultruded fiberglass radome. Allows outdoo installation even in harsh climates Vented system design. Provides reliable performance by protectin the electrical design against extreme moisture and/or temper tures. Thread relief on connector Improved accessibility for taping thus reducing installation time an improving overall effectiveness.

Product Narrative	High Performance PCS sector antenna sets many standards with durabiltiy and being reliable. 100% VSWR testing with excellent pattern performance.	The S18521PDNF antenna combines high performance and mechanical integrity features with versatility and fast, reliable mounting. At 21 dBi gain, it offers all of the range performance one would need even for distant links. Field adjustable for polarization and mounting hardware allows for +/- 20 degrees of elevation adjustment.	PCS sector antenna. Subject to extensive electrical and environmental testing. Nullfill provides excellent coverage in the near zone. Downtilt version.	Product Narrative

Product Narrative	Diversity Master dual polarized antenna. Two antennas in a single panel radome.	Dual polarized panel antenna with Slant 45 Degree design to optimize performance. High cross polar discrimination factor and high port to port isolation. Superior vertical pattern shaping for interference reduction.	eXsite Dual-slant polarized 16.9dB 65 degree panel array antenna.	Dual polarized panel antenna w Slant 45 Degree design to opti performance. High cross polar crimination factor and high po port isolation. Superior vertica tern shaping for interference r tion. The 7691 Series has Opti Manual Adjustable Electric tilt tuning flexibility.

30 to 2.50 GHz ntennas 45-20]				
uct Narrative	A broadband version of the XtremeWave yagi antenna covering frequencies from 2400 to 2686 MHz.	Die cast grid antenna is manufactured with magnesium alloy, stainless steel and aluminum. Weighs 33% less than aluminum antennas with no rust.	Welded aluminum construction for quick and simple installation. All antenna feed heads are unpressurized and enclosed in a Luran-S plastic radome for maximum UV protection.	The KPR-F Series antennas are suitable for low to medium capacity systems such as Rural Telephony Multi-Access Radio Systems and incorporate a HELIAX foam cable jumper assembly in the feed design.

d, lightweight grid antenna. ed windload. Adjustable ele- mount.	The KPF Series Parabolic GRID-PAK antennas are solutions for low wind loading situations. Grid antennas are single polarized, either horizontal or vertical, depending on assembly configuration.	Grid antenna designs offer lower windloading, typically reduced 40% or more from a comparable sized solid antenna without ice. SS Series feeds allow for easy installation and inspection. Type N Female connector, 50 ohm.	The KPF Series Parabolic GRID-PAK antennas are solutions for low wind loading situations. Grid antennas are single polarized, either horizontal or vertical, depending on assembly configuration.	The KPR-F Series antennas are suitable for low to medium capacity systems such as Rural Telephony Multi-Access Radio Systems and incorporate a HELIAX foam cable jumper assembly in the feed design.

Mount provides fine adjustment of azimuth and elevation.	Lightweight and rugged Spread Spectrum/ISM band parabolic antenna. Mount provides fine adjustment of azimuth and elevation.	SlimLine antennas are designed for short-haul microwave systems in all common frequency ranges from 10 to 40 GHz. SPF microwave antennas are designed for unlicensed NII (National Information Infrastructure) Spread Spectrum and ISM applications	Omnidirectional ISM base antenna is designed to cover whole band at 1.5:1 VSWR. No need for a ground plane and can be mast, wall or ceiling mounted. Internal O-ring seal in base prevents water from migrating into the connector.

eptor WLAN/ISM antenna xcellent crosspole patterns. eight and durable. Elevation adjusts 60 degrees in 10 increments.	Directional panel for WLAN are designed to obtain maximum gain in a small low profile package. Gray UV stabilized radome accepts non-metallic paints.	Low profile directional antenna well suited for both indoor and outdoor wall or mast mount applications. Ideal for offices, health care facilities, campuses and shopping malls.	Microceptor WLAN/ISM antenna has excellent crosspole patterns. Lightweight and durable. Elevation mount adjusts 60 degrees in 10 degrees increments.	This flat antenna provides cleaner signal, broader beamwidth and helps eliminate ghosting. Also allows for more installation options.

Type	Adjustable Sector Panel	Adjustable Sector Panel	Directional Panel	Sector Panel
Product Narrative	The XtremeWave sector panel antenna covers the 2.4 GHz ISM band and provides field adjustable horizontal beamwidths. This design allows a system installer to stock a single antenna and field adjust it to the desired beamwidth , making it useful for a variety of applications. The antenna features industry leading front-to-back ratios with excellent cross pole discrimination.	Sector panel antenna with adjustable side panels for 60-160 deg sector sizes. Designed for wireless data in the ISM band.	The Two-Way MMDS base station hub antenna is designed to provide broadband wireless data and internet connection to homes and business as well as to mobile wireless subscribers. The antenna is an excellent choice for Internet service providers (ISPs) as well as for wireless local loop application.	Flat panel 90 degree sector antenna. Custom pattern desi difficult areas. Standard mou provides 0-4 degrees downtil

ave Antenna Shield	spherical	Fiberglass Radome	4' Tegular Radome Kit	Conical
ld mounts to the top of a 4- D antenna mounting pipe litional stability is provided .H.S cable anchored to the To facilitate this anchoring, /8" a 12" turnbuckles and #7 cable are included.	Unheated radomes protect antennas from snow and ice. Reduce windloading designed to withstand winds up to 125 mph. Grey color fiberglass.	Radomes provide protection from snow and ice and reduce antenna windloading.	This kit prevents damage to the untensioned radome edge between J-bolt anchor points caused by unusually high gusting winds. Kit includes stainless steel edge protector strips and attachment hardware. The strips are fastened in pairs to form a band around the edge of the radome.	Molded radome for 2.4 and 5.8 GHz dish antennas. Molded of UV inhibited ABS plastic to protect the antenna from severe environmental conditions. Paintable.

Product Narrative	TEGLAR is a polymer coated fiberglass material that provides the greatest protection to microwave antennas in harsh environments. TEGLAR radomes are standard with all Andrew Ultra High Performance and UMX multiband antennas. They are optional for the High Performance antennas.	Unheated radomes protect antennas from snow and ice. Reduce windloading designed to withstand winds up to 125 mph. Grey color fiberglass.	Radomes provide protection from snow and ice and reduce antenna windloading.	TEGLAR is a polymer coated glass material that provides th greatest protection to microw antennas in harsh environmen TEGLAR radomes are standa with all Andrew Ultra High Pe mance and UMX multiband a nas. They are optional for the Performance antennas.

				Type	Multiband Indoor	Indoor Antenna	Multiband Indoor	Omnidirectional Patch Anten
Product Narrative	RFS MicroTenna provides quick and easy installation for indoor applications.	Combines trunking, cellular, GSM, ISM, DCS1800, PCS1900, frequencies into one indoor antenna. Low profile blends easily with internal enviroment for unobstrusive appearance.	Ceiling mount omnidirectional multiband antenna. Ideal for indoor corridor coverage. 360 Degree horizontal beamwidth. RF element is silver plated.	Ideal for integrating into almo device, the Microsphere's sma and low profile allow it to eas in a variety of locations. The directional pattern of this ant is suited to a variety of uses, ing hand-held devices, in-build systems or other applications where mobility is a factor.
Application	High gain ceiling or wall mount	For use with indoor applications from Cellular to PCS.	Corridor Coverage	The Microsphere antenna is designed for indoor or imbed applications.

				Antenna	Dual Band Omnidirectional	Dual Band Omnidirectional embedded Ceiling Tile	Dual Band Omnidirectional	Indoor Omnidirectional Antenna
file ceiling mount antenna l as a speaker baffle. Wide- tuning. Ground plane is ired. Paintable.	Ideal for integrating into almost any device, the Microsphere's small size and low profile allow it to easily fit in a variety of locations. The omnidirectional pattern of this antenna is suited to a variety of uses, including hand-held devices, in-building systems or other applications where mobility is a factor.	The ceiling Panel Antenna provides superior aesthetics over traditional antennas because the antenna is invisible from below and perfectly matches the rest of the ceiling. Also this dualband antenna will be used in voice applications enables operation with either voice band without additional panels.	Self contained in it's durable sleek radome, the Whisper antennas are designed to blend in anywhere. The 60 degree pattern makes this a great choice for wireless local loop, in-building wireless, WLAN, DECT, WPBX and broadband Internet access.	Dual band omnidirectional ceiling mount antenna.

Indoor Antennas (Cellular/SMR/PCS) [346-59]

Manufacturer Table	Centurion CAF95993	Radiall/Larsen PA2101850N	Centurion CAF94129	Maxrad, Inc MLPC1700PTRPTNC
				
Type	Outdoor/Indoor Panel Antenna	Indoor/Outdoor PCS	Omnidirectional Patch Antenna	Speaker Baffle Mount
Product Narrative	Self contained in it's durable sleek radome, the Whisper antennas are designed to blend in anywhere. The 60 degree pattern makes this a great choice for wireless local loop, in-building wireless, WLAN, DECT, WPBX and broadband Internet access.	60 degree directional flat panel antenna. Only 1.1" deep. White UV protected radome, laminated, closed cell foam construction.	The versatile Sphere antenna is uniquely capable of being mounted onto any surface,including metal. The Sphere is frequently ceiling-mounted in office and professional environments requiring wide area coverage. The Sphere antenna's tolerance to surrounding materials expands its suitability to almost any application.	Low profile ceiling mount an disguised as a speaker baffle. band, no tuning. No ground required. Paintable.

Antennas, Indoor

+ Suhner 9.0003	Cushcraft/Signals S18512P12NF	Centurion CAF94170	Centurion CAF94146	Centurion CAF94150
				door	PCS Indoor	Omnidirectional Patch Antenna	Omnidirectional Patch Antenna	Omnidirectional Patch Antenna
ee panel antenna for use in ystems. Lightweight & only nick. Aluminum construc- h ASA plastic radome. Small nt.	Wide H-plane antenna offers the system engineer an alternative to wall mounting omidirectional antennas. Wall-mounted Omni Antennas by themselves can suffer unduly from multipath components creted by the wall itself. Coax lengths and connector type can be adapted to necessary requirements. Applications: Offices, Health Care facilities, educational and industrial campuses, shopping malls, etc.	The versatile Sphere antenna is uniquely capable of being mounted onto any surface. It is commonly mounted in office and professional environments requiring wide area coverage.	Ideal for integrating into almost any device, the Microsphere's small size and low profile allow it to easily fit in a variety of locations. The omni-directional pattern of this antenna is suited to a variety of uses, including hand-held devices, in-building systems or other applications where mobility is a factor.	The versatile Sphere antenna is uniquely capable of being mounted onto any surface. It is commonly mounted in office and professional environments requiring wide area coverage.
overage	Direct Link indoor antenna provide an attractive medium for in-building RF distribution networks.	The versatile Sphere antenna is uniquely capable of being mounted anywhere.	The Microsphere antenna is designed for indoor or imbedded applications.	The versatile Sphere antenna is uniquely capable of being mounted anywhere.

Indoor Antennas (Cellular/SMR/PCS) [346-59]

Manufacturer Table	Maxrad, Inc MMSO2300	Maxrad, Inc MC2400PTNF	Cushcraft/Signals SM1852PSMF	Cushcraft/Signals SL1852P12NF
				
Type	Miniature Omni Antenna	Ceiling Mount	Female	Female
Product Narrative	Maxrad MMSO miniature omnidirectional antenna. Covers 2300 - 2500 MHz with a VSWR of less than 1.5:1. Ground-plane dependent antenna that is designed to go virtually undetected.	This antenna provides a low profile ceiling solution for indoor applications requiring minimum visibility. It can be easily mounted to drop ceiling tiles or to a solid ceiling surface where cable routing access is available.	The SM1852PSMF antenna offers the kind of uniform and symmetrical energy distribution that one normally expects from much larger antennas. No compromise performance in a very small package- only 2.0" x 1 5/8" x 1/4". This 2 dBi omni easily mounts to a ceiling grid.	The SL1852P12NF antenna of characteristics that one norm expects from much larger ants No-compromise performance very small package- only 2.5" x 0.8". This 2 dBi omni easily mounts to a ceiling grid.

Amplifiers and Filters

Cavities, Lowband [440-10]

Manufacturer Table	Sinclair FP-10107*3
Product Narrative	High-Q filter. Aluminum cylinder, brass/copper inner conductor, Invar rod.
Filter Type	Bandpass
Freq. Range (MHz) Maximum Input (Watts) Insertion Loss (dB)	66-88 400 0.5 to 3.0
Min. Seperation (MHz) Reject Attenuation (dB) Connectors	N/A N/A N Female
No. of Cavities/Size Electrical Length temp. Range deg-C	1 (7") 1/4 Wave -40 to +60
Maximum VSWR @ 50 Ohms Tuning Method Maximum Size (HxWxD")	1.5:1 Factory Tune 65 x 7 x 7
Finish Warranty	Grey 2 Years
Pattern	
TESSCO Part No.	**87595** *Specify Frequency
List Price: T-1 Price:	$488.00 $400.16
Ship lb.: T-2 Price:	48 lb. $366.00

Duplexers, VHF [440-31]

Manufacturer Table	Sinclair Q-201GR	Sinclair Q-2220E	Sinclair MR-256*1	RFS Celwave Series
				
Product Narrative	Q-Circuit base station duplexer. The design provides a quasi-band-pass response. Mounts on 19" rack with cavities positioned vertically.	Q-Circuit duplexer. The "Res-Loc" design allows mounting on 19" rack with cavities horizontal or vertical. Can be mounted on floor or wall as well.	Mobile duplexer. Has lightweight aluminum extrusion and tempera-ture compensated resonators.	Dual notch duplexer with pass/reject trace. High isol Includes brackets for mou horizontal or vertical surfa *Specify Frequency
Type	Pass Reject	Pass Notch	Notch (Reject)	Pass Reject

it base station duplexer. in 19" rack with cavities ed vertically. Cabinet not	Q-Circuit duplexer. The "Res-Loc" design allows mounting on 19" rack with cavities horizontal or vertical. Can be mounted on floor or wall as well.	Extremely compact mobile duplexer. Aluminum extrusion. Use when there are space limits. Adds minimal loss over larger mobiles.	Mobile duplexer with band-reject (notch) cavities. Extruded aluminum housing with solid shield copper jacketed intercabling.	Pass-reject (dual notch) duplexer. Cavities enclosed in metal case. RG214/U intercabling. 19" rack mount.

Matchers, Cross Band Couplers [440-85]

you are buying these, you may need:

ver Meters. . . . . .page 1421

and Couplers

39053

25839

Crossband couplers allow two transceivers to be connected to a single feedline. Another coupler at the top will separate the signals and direct them to the two antennas. Rugged enclosure. 0.3 dB typical insertion loss. SPECIFY 10 MHZ PASSBAND FOR UHF AND 800.

brid Coupler

26

58398

Hybrid couplers designed to combine two wireless carriers to a single antenna feed or distribution cable. This requires the termination of one output port in 50 Ohm and results in a 3dB loss in each signal. In situations where two simiar feeds are required, both outputs may be used eliminatating the need for a termination and the 3dB loss.

- t isolation
- led
- Indoor/Outdoor applications
- PIM < -140dBc

Power Sensors for Monitor Systems

The Sinclair "PM" series sensors are designed for use AMV-6A monitor/alarm systems (shown here). PM s are designed for better than 10% accuracy for both f and reflected measurements. Each PM sensor include 10' cables for connector to a AMV-6A.

te Monitoring Interface

98234

Reduce site operating costs and subscriber frustration by attending to site RF power problems the moment they emerge. Sinclair's Remote Monitoring Interface provides immediate notification of faults detected by the AMV-6A monitor via telephone, pager or remote computer. The RMI also allows for control pf the AMV-6A monitor from a remote location making it an ideal system for distant or difficult to access sites.

Manufacturer Mfg. P/N Warranty	Input Connector Output Connector	No. of Channels/Freq./Power Sensor Connectors	List ($) Wt. (lbs) Wgt. (kg.)	T-1($) T-2($) T-3($)

ve Wattmeter/Tx Keying Panel

16119

Panel displays forward or reflected power for up to twelve channels, generally 10 Tx and 2 antennas. Direction, scale and channel selection are chosen using front panel switches. Each transmitter can be keyed from panel. 50 uA display, 19" rack mount. Transmitter keying circuit connects to panel via screw terminals. For power measurements, a separately purchased PM1A/PM2A power monitor must be added to any coax to be monitored. Cables with phono plugs run from panel to each monitor. Field adjustment is required.

omatic Alarm Panel

Panel senses low power or high VSWR and triggers alarm condition. Also performs wattmeter function. Once sensing alarm situation, one of two latch relays are switched, and lamps lit. High VSWR alarm condition is adjustable within 25% of a 2:1 match. Low power condition can be set from 5W to full scale. Forward and reflected power are shown on W meter. Direction, channel, and reset switch are on front panel. 19" rack mount, Vdc powered. Includes one PM2 power monitor with N/F connectors.

Financing Solutions Go Way Beyond Open Terms

TESSCO's financing is collaborative, flexible and specific to your unique business needs. We're committed to providing timely and sufficient financing to minimize interruption in flow of products and services to you!

Open Terms

Our credit-granting process is simple and timely!

NEW!
TESSCO Extended Payment Terms

Take advantage of your good credit history to leverage your short-term financing needs.

- Available terms of 3, 6, 9 or 12 months
- Low fixed-interest rates
- Ability to budget fixed monthly payments
- Keeps existing lines of credit free
- Quick turnaround time

Joint Purchase Order Program

Increase your business credit capacity by leveraging your customer's credit-worthiness to secure a higher credit line for bigger purchases. Your customer issues a joint purchase order to both you and TESSCO, using TESSCO's remittance address. Your customer pays TESSCO directly, and you will be reimbursed within 24 hours. Your margin and your customer relationship are protected.

TESSCO® Platinum MasterCard

Receive deferred billing on all TESSCO purchases charged to your TESSCO® Platinum MasterCard. To learn more about many great benefits, click on **www.tessco.com/account/credit/mastercard** and mail your completed application to Business Lending Processing Center, PO Box 15973, Wilmington, DE 19885-5973.

Equipment Leasing Program

Balancing your company's cash flow can be a lot easier through leasing. Get financial flexibility and conserve bank lines for working capital, really important now for small- and medium-sized businesses. TESSCO offers a full range of leasing options with fast turnaround time, easy documentation, competitive rates, and affordable monthly payments! Contact **410-229-1176** or **leasing@tessco.com.**

Dealer & Reseller Financing

- End-of-the-month invoicing
- Escrow agreement for major deals
- Net 60 PO financing for special projects
- Third-party financing...it's your deal, but we take the credit risk, invoice your customer, and collect.
- Third-party leasing for reseller's customers

Enhanced Credit Capacity

Grow your business with the help of your personal credit. If your business is new and your business credit is not yet established, TESSCO will extend credit to your business through your personal guarantee.

3-Payment Plan, No Interest for 90 Days

Purchase equipment with three equal payments with the TESSCO® Platinum MasterCard.

Rental

TESSCO has broad offerings of test equipment available for established customers to satisfy short-term equipment needs.

EFT (Electronic Fund Transfer)

Simply provide pertinent bank information and your transaction will be processed by fast, efficient and secure electronic payment. You can also initiate EFT by completing our brief online form.

Bank Letter Of Credit

A letter of credit from a financial institution is accepted for purchases with special conditions agreed to by all parties.

Credit Card

TESSCO accepts credit cards, including American Express, Discover Card, MasterCard, and Visa.

Contact our financing experts at ct@tessco.com or call 410-229-1395

A **World-Class** Choice from **TESSCO**

The New Field-Proven Site Master Performs Even In The Toughest Environments.

Getting there and back is up to you.

The new C-Series Site Master features a handheld, battery-operated, field proven design so powerful, yet so small, that it fits in your backpack. Thousands of technicians just like you, have chosen Site Master because of its industry leading immunity to RF interference, ease of use, and its ability to pinpoint small, hard to find problems before major failures occur. New features such as on-screen test set-ups, multilingual user interface and InstaCal™ calibration further set the new Site Master apart from others.

Is it any wonder why Site Master is the world's best-selling cable and antenna analyzer? So, whether you're climbing a mountain or crossing a desert, your Site Master is built to perform under the harshest conditions. How well you'll hold up, we can't guarantee.

For more information call TESSCO at 800-472-7373. The Site Master from Anritsu. The preferred choice among leading network operators and service providers worldwide.

Discover . . .

Times Microwave Systems' LMR® non-kinking, flexible coax communications cable.

Until Times Microwave Systems LMR® flexible communications coax came along, you had to deal with hard-to-install connectors and be extra careful not to kink your corrugated feeder cables, cable assemblies and jumpers. Now, with the unsurpassed flexibility of Times LMR® coax and our easy to install connectors, you're assured ease of installation, while maintaining excellent low loss RF performance.

- More flexible than corrugated copper cable
- Non-kinking!
- Easy to install *EZ* connectors
- Comparable loss to corrugated cables
- Low VSWR
- Riser (FR) and Plenum (LLPL) cable versions available

Discover all the benefits of Times LMR®!

About Cables

Low VSWR Versus Standard

The terms generally used in the industry to describe hardline coaxial cables historically have been standard or premium cables. More recently, manufacturers are beginning to categorize them as low VSWR or standard.*

Standard cables are those off the standard production runs having characteristics which meet broad specifications for VSWR. A cable of this nature may, for example, have a maximum VSWR of 1.20:1 at frequencies to 2MHz.

Low VSWR cables also come off the standard production lines but are frequency swept (sorted) for specific frequencies to find low VSWR cable over a smaller frequency range.

For example, the same standard cable that has a maximum VSWR of 1.20:1 from 100 MHz to 2 Ghz could result in being classified as a premium cable for 800-900 MHz if the max VSWR between these frequencies was 1.10:1 or better. VSWR values for premium cables may also vary with the type connectors used, i.e., DIN, N, EIA flange, etc., as well as with the length of the cable.

Selecting Cable

Cable manufacturers list low VSWR cables by frequency ranges and the VSWR maximum values over these frequency ranges vary from one manufacturer to another. One may show a VSWR of 1.15:1 max as their low VSWR cable while another uses a VSWR of 1.10:1 max as their criteria. Use the cable most appropriate for your application. If you need low VSWR cable, then choose the one having the desired VSWR rating for your frequencies, connector types, and cable lengths required. Always specify your requirements by maximum VSWR and frequency rate.

Types of Cables

Corrugated Cables

Corrugated cables are constructed with corrugated outer conductors and either corrugated, smooth wall, or solid inner conductors depending upon size. Sandwiched between the inner and outer conductor is a foam polyethylene dielectric material.** The purpose of the corrugations is to provide an element of flexibility to the cable while maintaining structural integrity and 100% shielding of the inner conductor. The outer conductor is considered seamless because it is welded as a homogeneous mass.

Smooth Wall Cables

Smooth wall cables use smooth wall tubing (or tape) for the outer conductor and either solid or smooth wall tubing for the inner conductors, depending upon size. They are separated by a foam polyethylene dielectric material.** When seamless, they exhibit less attenuation (lower loss) and equal minimum bend radius but are less flexible than corrugated cables in application.

Braided Cables

Braided cables are constructed with a braided outer conductor and generally stranded wire or solid wire inner conductor. Some braided cables use a metallic sheath which encases the cable and serves as the outer conductor, while the braid adds flexibility and strength. These are separated from the center conductor by the foam polyethylene dielectric material.**

Handling Corrugated Coaxial Cables

Inspection

Corrugated coaxial cables are rugged and will provide many years of high performance operation provided that they are handled properly during the process of de-reeling, hoisting and securing to the tower, building or other structure.

It is imperative that the cable be closely inspected. Visual inspection will not, by itself, disclose hidden flat spots or dents. A combination of visual inspection and a hands-on process will provide the best method of finding defects before the installation is completed. Have someone place a hand around the circumference of the cable and using light pressure feel the cable as it glides through the hand during the cable de-reeling process. Any irregularities, such as flat spots, are easily detected in this manner.

A good practice would be to sweep the cable before and after installation to detect shipping damage, as well as any damage that may have occurred during installation. In addition, the use of fault location devices is helpful when the cable is not performing to specifications due to a mechanical defect.

It should be noted that VSWR values resulting in pass or fail result from periodicities and/or amplitude of the spike. Even low VSWR cable has spikes, but the amplitude is below the specific value required.

Hoisting

When hoisting cable, have the payout reel of cable an adequate distance from the base of the tower or other type structure and maintain tension on the cable to keep it from slapping against the tower or other structure. This is one of the main causes of dents and flat spots during installation.

Always observe the minimum bend radius rating for each cable size. If this radius is exceeded (made smaller) than the rating, the corrugated copper outer conductor and inner conductor will be damaged, thus changing the characteristics of the cable. At this point, it will be necessary to cut out the damaged section and add a cable splice or replace the entire cable.

Due to the periodicity phenomenon, distance to fault measurements must be correlated against the VSWR trace. More often than not, a single fault (physical) does not generate a VSWR failure.

Hoist Grips

When hoisting cable, always use hoist grips. The hoist grip should be located below the top connector and held firmly in place by the lacing or by the self-gripping action of closed woven grips. Never attach any hoisting grip to the connector or to grounding strap terminations.

Hoist grips should be used every 200 feet. For cables whose length exceeds 200 feet, the hoist grip should be left on the cable and tied off to the tower or other support structure so that the weight of the cable is supported by the grips and not by the cable hangers or cable ties.

Cable Hangers

When attaching cable hangers or their clamping mechanisms to the cable, do not overtighten. Cable hangers are not meant to provide full support of the weight of the cable. That is the job of the hoist grips. Hangers are designed to keep the cable in a fixed position on the tower or the structure. Tighten only enough to prevent movement of the cable within the hanger.

* This change reflects the understanding that there has been some confusion over premium connectors (silver plated), which may be installed on low VSWR or standard cable.

** Or solid polyethylene tubing and spacers creating an air dielectric.

Cables

Andrew Low Loss Braided Cables

429329

Andrew "CINTA" Braided cables are constructed with t est quality copper, aluminum, and polyethylene materials Andrew braided cables are compatible with industry co tors, tools, and all other needed accessories.

- Great for point to point Applications
- Point to Multipoint
- High Performance and exceptional Quality
- Uses RFI and Times Connectors

1/4" Andrew Connectors for FSJ1-50A

ANDREW connectors are the only connectors completely compatible with HELIAX cable. Excellent electrical contact results in outstanding RF shielding. High resistance to pull-off and twist-off provides long term mechanical integrity. Also offers a wide selection of interface types simplifies system planning.

1/2" Eupen Connectors for EC4-50-HF

Premium connectors for 1/2" superflexible cables. The o piece design eliminates lost parts, and allows for ease of i tion. The connector simply screws onto a stripped cable, viding a clean and solderless installation. Both the inner a outer contacts are silver plated to protect from intermo tion and corrosion. High water tightness and retention.

TERACOM Waterproof 1/2" Flex

33007

97828

TERACOM connectors for copper corrugated cables are IP68 classified (water-pressure proof to 25 meters). No need for any external weatherproofing. Auto-flaring, with high quality O-rings against outer conductor and cable jacket ensure funtional integrity. Designed to maintain high pressure on contact surfaces to reduce intermodulation products.

TERACOM Waterproof 1/2" Connectors

58482 58419 58453

TERACOM connectors for copper corrugated cables are IP68 classified (water-pressure proof to 25 meters). No need for any external weatherproofing. Auto-flaring, with high quality O-rings against outer conductor and cable jacket ensure funtional integrity. Designed to maintain high pressure on contact surfaces to reduce intermodulation products.

5/8" Andrew Connectors for LDF4.5-50

451136

438107

422130

474114

Standard connectors for Andrew LDF4.5-50 5/8" foam cable. Features such as pre-set pin depths and self flaring mechanisms ensure fast, accurate installation along with the benefits of low intermodulation and low VSWR. Designed to meet IP68 standards. Body and pin plating can differ depending on connector.

7/8" Andrew Ring Flare Conn for LDF5-50B

Andrew Ringflare connectors are now available for LDF5-50B, 7/8" HELIAX coaxial cable. RingFlare connectors feature fewer parts than standard conectors, with no compromise in electrical or mechanical performance. The RingFlare design simplifies the attachment process and shortens installation time.

- Installs in moments
- Fewer parts than standard connectors
- Low VSWR and IMD
- Waterproof mated and unmated
- Self-lubricating O-rings
- Interchangeable interfaces accommodate system design changes

7/8" Commscope Conn for CR50-1070PE

90011 38404 76797

These premium connectors for 7/8" Cell Reach cable are designed to provide the lowest VSWR and intermodulation levels in the industry. A unique coring tool is used during installation, greatly reducing connectorization time and ensuring optimum electrical contact. Other features include superior retention force, tarnish resistance, and waterproofing.

COM Waterproof 7/8" Connectors

23669

10455

59568

97961

TERACOM connectors for copper corrugated cables are IP68 classified (water-pressure proof to 25 meters). No need for any external weatherproofing. Now TERACOM makes installation easy with a new one piece connector. Prep the cable using a TERACOM connector kit, slide the connector on the cable, tighten the center pin and the connector body and you are done. Nothing is simplier!

TERACOM Waterproof 1 1/4" Connectors

419103 457116

TERACOM connectors for copper corrugated cables are IP68 classified (water-pressure proof to 25 meters). No need for any external weatherproofing. Auto-flaring, with high quality O-rings against outer conductor and cable jacket ensure functional integrity. Designed to maintain high pressure on contact surfaces to reduce intermodulation products.

1-5/8" RFS Conn for HCA78 & HCC78

23257

39693

Radio Frequency Systems connectors for CELLFLEX cables can be easily attached in the field or installed by TESSCO'S expert technicians. They are designed to provide resistance to pull-off and twist-off as well as provide excellent electrical contact. Standard connectors are brass bodies. Connectors are weatherproof, require no soldering or flaring and are easily field installed.

Connector Installation [420-92]

Custom Connector Installation

Custom installers are factory trained and certified to be proficient in connector attachment. Custom installers put their connector attachments through the same rigorous testing procedures as the factory does. Certificates of Compliance are available for all cable assemblies where connectors are installed by Custom technicians.

FME Connectors & Adapters [410-38]

If you are buying these, you may need:

Power Meters ..... page 1421

FME Male Crimp Connectors

These FME connectors crimp onto standard RG-sized cables. FME connectors are also known as ACC or nipple connectors. FME males have a small pin. FME females are hollow, fit inside the male and surround the pin, and come attached to the cable on many mobile antenna mounts.

s LMR Jumpers

Jumpers made from LMR series cable are ideal for use between main feeder cable and antennas. The LMR cable, with it's braided outer conductor, provides a jumper that combines low loss with high flexibility. All of the jumpers are built by our expert technicians.

Jumper Assemblies-Superflexible Cables [412-93]

RFS Cellflex Molded Jumpers

RFS CELLFLEX molded jumpers constructed of copper corrugated cable and manufactured using a factory automated process that solders the inner and outer conductors. The connector cable assembly is then secured inside an injection molded enclosure that provides strength and a waterproof seal.

- Factory Soldered Connectors
- Injection Molded Seal
- Low, Stable IM performance
- Low VSWR
- Waterproof to IP 68
- High Pull Off Strength

Andrew FSJ4-50B Sureflex Jumpers

Andrew Sureflex jumpers consist of proven HELIAX cable and connectors that are specially developed and designed by Andrew. Body can be silver or brass plated depending on connector. Pin can be silver, brass or gold depending on connector used. Jumpers are 100% waterproof and uses a unique double solder patented technique to give excellent system performance.

RFS 1/2" Cellflex Molded Jumpers

RFS CELLFLEX molded jumpers constructed of copper corrugated cable and manufactured using a factory automated process that solders the inner and outer conductors. The connector-cable assembly is then secured inside an injection molded enclosure that provides strength and a waterproof seal. Jumpers are made with standard brass connectors.

- Factory Soldered Connectors
- Injection Molded Seal
- Low, Stable IM performance
- Low VSWR
- Waterproof to IP 68
- High Pull Off Strength

Hanger Kits [436-10]

If you are buying these, you might need:

Site Hardware . . . . . .page 498

Standard Hanger Kits

482185 489172 428138 445112

Stainless Steel Standard Hangers provide a reliable solution for supporting single runs of coaxial cable in wireless systems. Cable grippers bite into the coax jacketing to provide additional support. Recommended spacing is one hanger for every 3 feet of cable. Use with corrugated or smooth wall cables. Comes with or without hardware.

Butterfly Hanger Kits

14347 87381

Stainless Steel Butterfly Hangers provide a versatile means of securing single runs of coax or elliptical waveguide. Cable grippers bite into the coax jacketing to provide additional support. Use with either round member adapter kits or angle member adapters depending on the tower leg. Recommended spacing is one hanger for every 3 feet of cable. Use with corrugated or smooth wall cables. Comes with or without hardware.

ap-In Hangers

75431 426150

Stainless Steel Snap-In Hangers, which simply push into pre-punched 3/4" holes, save installation time over standard bolt-on hangers. They utilize a four prong locking design that ensures a positive attachment to the mounting surface and a four tab cable locking system to secure the cable within the clamp. Use one for every 3' of cable. 10 per package.

Andrew Snapstak Snap-in Hangers

The New Snapstak snap-in hangers can be stacked up to three deep when using 1/2" and 7/8" coax, or two deep when using 1-1/4" and 1-5/8" coax. Each hanger accomodates one run of HELIAX cable. The distinctive, self-contained design of the SnapStak stackable snap-in hangers eliminates the need for mounting hardware and installation tools. This simplifies coaxial cable installations, lowering both time and cost.***ORDER ANGLE ADAPTOR OR ROUND MEMBER SEPARATE***

- No Hardware Required!
- Absorbs Vibrations!
- Versatile Installation Options!
- New antenna systems can now be added to crowded tenant towers

Standard Grounding Kits

487122 86894

The Standard Ground Kits facilitate easy installation with a pre-formed copper strap that eliminates the need for a coiling tool and prevents overtightening. They are designed to comply with MIL-STD-188-124A and have been verified by independent labs to protect coax from lightning strikes in excess of 200 kA. Each kit includes either a 2' or 5' 6-gauge 7-strand copper ground lead. The 5' lead can be trimmed to the exact length needed. Also included is either a two-hole or a one-hole lug which come attached or unattached. All necessary for attachment to the buss bar, mastic and electrical tape for weatherproofing for each kit. Kits are available for both coax and elliptical waveguide.

Clip-On Ground Kits

69929 488148

The Clip-on Ground Kits provide the ultimate in of installation and provides reliable protection of coaxial cable system. The clip design and pre-form strap allows them to be easily slipped over the o conductor of the coax and firmly latched into pla They greatly reduce installation time over standa bolt-on grounding kits. Designed to comply with STD-188-124A. All buss bar attachment hardwar included, along with required mastic and electric for weatherproofing. Each kit also includes a 6-g 7-strand copper ground lead with your choice of lengths and attached or unattached lugs.

mium Universal Grounding Kit

25538 55646

This Premium Grounding Kit installs like a traditional kit, but has a unique design point allowing one kit to fit any cable size from 1/2" to 3". It features an elongated flat ground strap which the installer must simply cut in a pre-marked spot depending on the cable size used. Because it is universal, it will lower your inventory costs and ensure that you have the right kit in the field when you need it. Also included is a complete weatherproofing package with butyl and electrical tape.

Universal Grounding Kit

63823 28803

Unique cable grounding kits adjusts to fit cables from 1/4" to 2" in diameter. Strap offers low resistance and inductance than grounding wire. Quick installation with one nut driver. Adjustable strap to cable angle. Includes weatherproofing materials. Four different models to eliminate problems associated with bonding dissimilar metals.

Hard Shell Grounding Kits

Hard Shell Ground Kits install in less than 3 minutes with no more tapes or mastics! Designed to meet MIL-STD-188-124A, and verified by independent labs to protect from lightning in excess of 200 kA. Preformed copper clamp prevents overtightening. Durable weather-resistant cover is ideal for use in applications with extreme temperatures, or where UV stability is required. Silicone sealing gasket prevents moisture ingress over the life of the product. Ground lead is 60" long.

Waterproof Grounding Kits

52745

TERACOM grounding kits are fast and easy to install. Made of silver plated brass, these grounding kits have a high contact surface area and is IP68-Classified (water-pressure proof to 25 meters). These waterproof ground kits require no external weatherproofing, like buytl rubber and electrical tape. They are also reusable.

Dehydrators [415-10]

SPD Dehydrator (Low Volume)

The SPD dehydrator consist of a 1/10th hp. shaded motor compressor, 0-15 psig pressure gauge, a pressure switch, low pressure alarm, high pressure safety relief valve and clear plastic canister with two pounds of desiccant. Output capacity rating is 1.0 scfm. Output pressure is factory set to a 3-8 psig on/off (20.7-55.1 kPa) with a differential setting of 5 psig. Output pressure and differential may be readjusted in the field to desired settings between 1 and 10 psig. Due to the limited service time of the desiccant, the SPD-10 is not recommended for purging. If used for purging , it may be necessary to run the desiccant through several regeneration cycles

50875 1 EACH	RFS Cablewave 933629 1 Year	115VAC, 250W power consumption, Ambient Temp 33-120 Deg.F, SPST 24 volt low pressure alarm contacts, 15ft 3/8" tubing. Dimensions: 13" x 9" x 11".	955.00 28 12.73	811.75 764.00 711.48

APD Dehydrator (Medium Volume)

The APD-20 Automatic Pressurization Dehydrator is designed for reliable pressurization of elliptical waveguide, coaxial cable and rigid transmission lines. The unit is rated at 0.2 SCFM (.09 liter/sec) and -40 deg.F dry dew point output at a 95 Deg.F 95% relative humidity input. Output pressure is factory adjusted to 3 psig "on" and 5 psig "off" but may be readjusted in the field to operate anywhere between 2 and 15 psig. A check valve prevents loss of pressure back through the dehydrator and a standard low pressure switch, set at 1 psig, activates SPST contacts for remote monitoring. May be shelf mounted or placed in a 19" EIA rack.

APD Dehydrators (Large Volume)

The APD-70 Automatic Pressurization Dehydrator is rated at 0.7 SCFM and is designed for operation in larger systems with up to 1700ft of 6 1/8" diameter transmission line. The APD-70 generally is similar in design and features to the APD-20 series, except that the APD-70 has the larger capacity and includes a protective metal rear cover as standard equipment. From normal room temperatures, the unit delivers typical dry air dew points of -60 Deg.F. The pressure output control is factory set at 3psig "on"and 5 psig "off". A check valve prevents loss of pressure back through the dehydrator. A standard low pressure alarm switch, 1 psig, is included for remote monitoring.

Andrew Gas Distribution Manifolds

Andrew MN6600 series Manifolds are gas distribution systems that provide unlimited pressure outlets from a single pressure outlet. Each Manifold section is equipped with a 1/4 turn ball valve and pressure gauge. In order to receive a 4 or 6 port you would need to order (2) for a 4 outlet and (3) for a 6 outlet.

- Individual manifold sections are supplied fully assembled.
- (2) Types MN6600 has a 0-15 lb/in pressure gauges and the MN6600-L is for the lower side of 0 to 2 lb/in pressure gauges.

Cellular Pipe Frame

45030

Cellular Pipe Frames mount directly to 4-1/2" OD round tower legs or to other 4-1/2" OD support memebers. Pipe Frames can also be mounted to wood or monopole installations using Wireless Solutions Chain Mount Kit or Ring Mount System. Each Frame is manufactured from a high strength 3-1/2" OD support pipe which is hot dipped galvanized. Includes all assembly and attachment hardware, 2 stabilizer arms and brackets for mounting to 4-1/2" OD round members. Antennas are secured to frames by Pipe Mount Kits which attach directly to the horizontal support pipe. Order Pipe Mounting Kits used for mounting to 3-1/2" pipes seperately..

Tower Pipe Frames

494392

Tower Pipe Frames are a versatile mounting system providing dependable support for sector antennas. Three 2-3/8" OD mounting pipes are included (either 72" or 114") to accommodate most common antenna sizes. Tower Pipe Frames feature universal clamps which directly mount to 2-1/2" to 9" OD round members. These frames can be used in conjunction with with standard 4-1/2" pipe mounts and saddle mounts when attaching to angle or tapered legs. A 2-3/8" OD stabilizer arm provides additional stability. Hot dipped galvanized construction.

Vertical /Tapered Boom Gates

440328

The Boom Gate consists of a heavy-duty antenna mounti frame, bolted to a 3' welded stand-off bracket. This design allows the frame to pivot at the end of the bracket. The B Gate is available in a 10 foot wide (3 antenna) or 13 foot (4 antenna) version and comes complete with all require 8" OD antenna mounting pipes. Assemblies for use on str or tapered tower legs are available and require separately chased clamp sets. When attaching to tapered legs with 1: less taper, use a standard Boom Gate with clamps for tape members. For tapers greater than 1:20, use a Tapered Bo Gate and a tapered clamp set. Two 2 3/8"OD stabilizer ar are included for additional stability and all parts are hot d galvanized for corrosion resistance.

Boom Gate Clamp Sets

38499

These clamp sets allow Boom Gates to be mounted to tower legs or other port members. Versions are available for either vertical or tapered members for angled members. Tapered clamp sets are used with standard Boom Gate less than 1:20 taper. For tapers greater than 1:20, tapered clamp sets should used with Tapered Boom Gates. All components are manufactured from hot dipped galvanized steel to ensure long service. All assembly hardware for at ment to the Boom Gate and to the tower leg is included.

wer-Mounted Frame

87170

Wireless antenna tower mounted frames are available for mounting panel antennas adjacent to a towers vertical leg or pipe mount. Frames mount to a 2-7/8" or 4-1/2" pipe and supports 2-4 panel antennas across a 10-13 ft face. Frames come with 66" long mounting pipes. Frames are designed for 100 mph wind and 1/2" radial ice per EIA-RS-222-C. The frame supports panel antennas with up to 8 sq ft of flat plate equivalent area.

wer Stand-off Pipe Frames

470116

Tower Stand-off Pipe Frames provide reliable support for an entire sector of antennas while standing the array approximately 54" away from the support structure. Ideal for co-location applications on guyed and self supporting towers. U-bolt hardware to mount the Frames at the apex to a standard 4-1/2" OD round member or 4-1/2" OD pipe mount is included. Necessary hardware to mount the Frames to other member types or sizes must be purchased separately in order to ensure the mount is completely vertical and is able to be rotated horizontally for proper orientation. One 3-1/2" OD x 18' stiff arm is included. Hot dipped galvanized.

wer Stand-Off Frame

93048

Tower Stand-Off Frame. Features a 12' face for optimal antenna spacing and capacity plus stands antennas approximately 5' off the tower. Standard 4.5" pipe is integrated in the frame. Pipe leg clamp kits for mounting to the tower are not included. For antenna mounting (1) pipe attachment kit (Sku 93048) and 2-3/8" plain end pipe must be purchased separately minimizing cost and increasing flexibility in antenna placement.

Mounts, Pole [341-45]

Universal Ring Mount Brackets

462157

The Universal Ring Mount system is a next generation design for co-locating at virtually any size and any pole. Two sizes are offered to accommodate round or polygon shaped monopoles from 10" to 60" in diameter. U-bolts are included to allow antennas to be directly mounted to the system via Plain End Pipe, facilitating a low profile installation. Order antenna pipe support arms and pipes separately. Hot dipped galvanized.

Low-Profile Co-Location Platform

66893

The Low-Profile Platform is an instant monopole co-locat solution. The universal design uses Ring Mounts (purchase separately) for robust support and simplified attachment monopole. Low-profile for reduced visual impact. Grated ners leave an opening close to the pole for easy access ar cable routing. Antennas are mounted via separately purch Pipe Mount Kits (See Cellular Pipe Frames table for Kits) structed of hot-dipped galvanized steel.

Monopole Bracket Standoff Mount

60654

Standoff mounts bolt directly to a Tri-Bracket and enable installation of either one or two antennas, using separately ordered antenna mounting pipes. Standoff mounts can be used alone or in combination with Sector Arm Mounts.

Part No. Qty/Uom	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T-1($) T-2($) T-3($)
99047 1 EACH	Microflect/Valmont B1827 1 Year	27" standoff mount for dual antennas. Provides from 0 - 30 degrees of downtilt. Galvanized.	225.00 94 42.72	221.63 220.50 219.38
60654 1 EACH	Microflect/Valmont B1826 1 Year	48" standoff mount for single antenna. Galvanized.	180.00 55 25	177.30 176.40 175.50

Monopole Bracket Standoff For T-Arm

63152 36724

Standoffs bolt directly to a Tri-bracket and enable installation of a T-Arm frame for mounting sector antennas. The standoffs, either straight or curved, are both 59 1/2" long, which provides for a 62" antenna spacing from monopole.

Part No. Qty/Uom	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T-1($) T-2($) T-3($)

Mounts, Base Antenna

Monopole Bracket Sector Arm

35475

Sector mount arms bolt directly to a Tri-Bracket and enable installation of two antennas. The two antenna mounts, facing adjoining sectors, may be downtilted between 0 and 30 degrees. Order antenna mounting pipes separately.

Part No. Qty/Uom	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T-1($) T-2($) T-3($)
35475 1 EACH	Microflect/Valmont B1868 1 Year	Sector mount arm for two antennas, 6' sector separation, 0- 30 degree tilt, 39" standoff, galvanized.	215.00 81 36.81	211.78 210.70 209.63
22261 1 EACH	Microflect/Valmont B1867 1 Year	Work support for B1868 sector mount arm. The worker's weight is supported on the B1867 work support, while being tied off to the B1868 Sector Arm Mount. Work surface is made from a 7" wide grating section.	160.00 52 23.63	157.60 156.80 156.00
73868 1 EACH	Microflect/Valmont B1824 1 Year	Curved sector mount arm for two antennas, 12' sector separation, 0 - 30 degree tilt, 80" standoff. Galvanized.	365.00 133.2 60.54	359.53 357.70 355.88

T Arms

49938

T-Arm frames bolt to the end of a standoff and enable installation of the antennas for a sector. Available with either a 10 foot (3 antennas) or 13 foot (4 antennas) face. Order antenna mounting pipes separately.

Part No. Qty/Uom	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T-1($) T-2($) T-3($)
49938 1 EACH	Microflect/Valmont B1821 1 Year	10' face for three antennas. Galvanized.	200.00 111 50.45	197.00 196.00 195.00

Tri-Sector Standoff Chain Mount

24352

Standoff Chain mount for round steel or wood poles from 5.5" to 36" diameter. Each 40" standoff arm supports one antenna at its end. Order antenna mounting pipes separately.

Part No. Qty/Uom	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T-1($) T-2($) T-3($)
24352 1 EACH	Microflect/Valmont B1883 2 Years	Standoff Chain Mount kit with 3 arms.	700.00 161 73.17	689.50 686.00 682.50

Monopole Bracket Pipe Mount

85833

Pipe mount bolts directly to a Tri-Bracket and enables installation of a microwave antenna. Includes brackets for attachment of the antenna's azimuth rod.

Part No. Qty/Uom	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T
85833 1 EACH	Microflect/Valmont B1832 1 Year	4 1/2" OD x 60" long pipe mount for attachment to Tri-Bracket.	170.00 107 48.63	16 16 16

Monopole Chain Mount

496126

The adjustable Monopole Chain Mount attaches frames and antennas to either or multi-faced monopoles. Mounts with a 8" chain accommodate monopoles fr to 30" in diameter and mounts with a 16" chain accomodate monopoles from 8 60" in diameter. Standard mounts use 2 pairs of chains for securing frames or a nas while the heavy duty Triple Chain Mount provides an additional pair of chai required to mount 8' and 10' microwave antennas.

Part No. Qty/Uom	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T
24322 1 EACH	Wireless Solutions MT-242 3 Years	Polygon Monopole Chain Mount with 4-1/2" x 63" pipe mount and 8' chain.	345.00 130 59.08	33 33 33

Universal Stand-Off Bracket Mount

The Universal Stand-off Bracket Mounts provide a 36" or 48" stand-off distance for mounting wireless antennas. A 2-3/8" OD x 48" pipe is welded to the end of the arm facilitating quick attachment of directional or amni antennas. One stiff arm is included to provide additional stability for the bracket. When mounting to round or angle tower legs Stand-off Mount Kits (Sold separately) will fit individual leg sizes. When mounting to monopoles or wood poles Chain Mounts may be used. Hot dipped galvanized steel construction.

Stand-off Wall Mounts

Heavy duty Stand-off Wall Mount provides 3' of stand-off distance for microwave dishes and panel antennas. The versatile mount features adjustable clamps to accept both a 3" or 4-1/2" OD pipe which are commonly required by dish antennas. Plain pipe must be ordered seperately. Includes a welded diaganol brace for additional stability.

Mounts, Base Antenna

Cantilever Wall MT.

The cantilever wall mount bracket provides a secure, low profile support for wireless antennas in wall-mounting applications. The design keeps the antenna close to the supporting wall, minimizing the visual impact of the antenna.

Part No. Qty/Uom	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T-1($) T-2($) T-3($)
58383 1 EACH	Wireless Solutions MT-250 3 Years	Order 2 3/8" OD pipe separately.	75.00 8.96 4.07	73.50 72.75 72.00

Cantilever Wall MT.

Cantilever wall mounts for wireless antennas that enable single panel or whip antennas to be mounted to a flat wall. Mounts available with three different lengths of 2-3/8" OD pipe. Mounts include the pipe, two slider brackets and U-bolts. All material is hot-dipped galvanized. Order mounting hardware seperately.

Part No. Qty/Uom	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T-1($) T-2($) T-3($)

ow Profile Roof Mount

44695

The low profile ballast frame supports three wireless antennas on a single frame and provides a maximum 7' 6" antenna separation. The frame stands only 3 feet high and the ballast frame measures 7' 3/8" x 7' 11". Order antenna mounting pipes separately. Optional accessories are rubber mat kit (2 required...sku 48561) and ballast tie-down kit (sku 22193).

orner Rooftop Frame

30885

The corner roof-top frame provides the mounting of 4 wireless antennas across each of two faces. The frame may be located in the corner of a building roof and the antennas on both faces oriented to the desired azimuth. The antennas mount in several positions across the faces, with maximum seaparation of 14'. The frame is secured with customer supplied ballast. Order antenna mounting pipes separately.

Qwikmount Non-Penetrating Mount

62530

•Patent # 5979844

Qwikmount, non-penetrating roof mounts, utilize water as ballast, eliminating th cost and hassle of transporting bricks, sand or concrete to the roof. Ballast tank comes in three sections, for easier shipping and handling, and quickly bolts toge Qwikmount can be carried by one person in a freight elevator and that person completely assemble in as little as one hour. Roof load is 20 psf for single tank, 4 for double tank.

•This is the patented RoofSafe line of Qwikmoun

oped Roof Mount-Panel Antennas

94

The Sloped Roof Mount supports an individual panel antenna on roofs with slopes of 0 - 45 degrees. The 2-3/8" OD pipe mast extends to a height of 10'3" above the roof and provides an 8' long antenna mounting area. The mast is adjustable to provide a plumb installation regardless of the roof slope. Mounting base is 50" wide and is secured to the roof via hardware that is provided. Max wind loading is for 100MPH 1/2" ice per EIA-RS-222-C.

Coax Penetration Pipes

84159

Coax Penetration Pipes can also be purchased separately to provide coax pene tion points around the base of the access tube roof hatch. Penetration pipes are ically used in applications where pod mounts are not utilized to provide coax penetration through the access tube hatch plate. Penetration pipes are manufactu from 4" to 6" diameter and 10" long schedule 80 raw steel which are seal welde into position to accommodate multiple runs and sizes of coax.

Mounts, Water Tower [341-55]

ter Tank Roof-Top Shell Frame

Designed to provide the versatility required when installing sectored antenna arrays around the shell perimeters of water storage tanks. Each frame features 2-7/8" x 78" vertical pipes to accomodate three directional antennas. All required hardware for the assembly of the water tank roof top shell frame is included.

No. Jom	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T-1($) T-2($) T-3($)
112 CH	Wireless Solutions WT-RTA12-9-96 3 Years	3 sector , 12' wide face with a 7 foot wide end panel for inconnecting to the next assembly. Three 2 7/8" OD x 96" pipe mounts are included. 3 complete assemblies required to make a circular configuration.	3,850.00 2200 999.9	3,773.00 3,734.50 3,696.00

ter Tower Roof-Top Tripod Mount

The Water Tower Roof-top Tripod Mount is specifically designed to compensate for the sloping angle of the top of the tank. Bolt on feet at the base of the mounting post and 2 support legs allow adjustment on any uneven surface and to provide optimal antenna placement and positioning. Manufactured from hot dipped galvanized steel and includes all assembly hardware.

No. Jom	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T-1($) T-2($) T-3($)
W 233 CH	Wireless Solutions WT-TMA-96 3 Years	includes a 2-7/8" OD x 96" mounting pipe.	305.00 229 104.08	298.90 295.85 292.80

ter Tank Mount-Panel Antenna

The Water Tank Mount is similar to the 99284 Sloped Roof Mount and supports one panel antenna on steel surfaces with slopes of 0-45 degrees. The base consist of three 1/2" thick x 12" square steel plates that are field welded to the tank surface. Provides 10'3" long 2-3/8"OD fully adjustable mast for antenna mounting. Max wind loading is for 100 MPH 1/2" radial ice per EIA-RS-222-C. Material is hot-dipped galvanized.

Universal Pipe to Pipe Mounts

10497

The DB5091 utilizes three clamps on a galvanized steel tube t mount DB504K, DB810 and DB812 antennas to round tower members.

Part No. Qty/Uom	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T-1($) T-2($) T-3($)
10497 1 EACH	Decibel Products DB5091-3 5 Years	No-Torsion mount for attaching DB810 and DB812 series antennas to 3" OD pipes. Heavy duty, galvanized with square tube for reinforcement.	195.00 30 13.64	147.23 144.30 141.38
99840 1 EACH	RFS Celwave PD46 5 Years	Universal clamp set. Mounts antennas with 1" to 2 3/4" support pipes to structures having 1" to 2 3/4" dia. support pipes. Can also attach to 2" x 2" angle iron. Set of two. Galvanized.	44.00 6.25 2.84	33.88 33.00 32.12
97439 1 EACH	Antenna Specialists ASPR616 1 Year	Antenna clamp set. Two clamps for mounting antenna to mast or tower leg 1" to 2 7/8" in dia. All parts galvanized for long life.	59.00 7 3.18	44.55 43.66 42.78
30095 1 EACH	RFS Celwave PD346 5 Years	Heavy duty universal clamp set. Mounts antennas with 2 3/8" to 4" dia. support pipes to structures having 2 3/8" to 4" dia. support pipes. Can also be used on 3" x 3" angle iron. Set of two.	138.00 16.2 7.36	105.16 103.50 101.43

Dapa Pipe to Pipe Mounts

29260

To install the Fix 903/905, orient the antenna so the vent caps are facing down. Attach the fixation to the upper and lower mounting brackets of the antenna

- Parts included for the Fix 903/905:
- Four (4) fixation brackets
- Four (4) threaded rods
- Sixteen (16) stainless steel lock washers
- Sixteen (16) stainless steel nuts
- One (1) mounting tool

Double Antenna Clamp

445176

The Double Antenna Clamp is a unique antenna mounting bracket which allows two sector antennas to be accommodated by a single support pipe. This design makes the Double Antenna Clamp ideal for supporting panel antennas at the end of stand-off brackets in six-antenna wireless systems.

Wireless Solutions Crossover Plates

63379

Wireless Solutions Crossover Plates are versatile brackets allowing two pipes to be secured together at right angles. U-Bolt style utilizes U-bolts to hold both pipes firmly in place, and are included in each kit. The Clamp Style features adjustable clamps which provide the versatility to accommodate a wide range of pipe sizes. Crossover Plates are hot-dip galvanized to ensure long-term reliability even in extreme environments.

Universal Adjustable Tapered Pipe Mount

479146

The Universal Adjustable Tapered Pipe Mount can accommodate virtually any mounting application. Consists of 4-1/2" OD x 5' pipe mount with top and bottom pivots and upper pre-punched adjustment support braces which enables mount to accommodate either straight or tapered legs and adjust to a vertical downtilt up to 20 Degrees. Secured with six 5/8" x 1-3/4" bolts. Hot dipped galvanized construction. In order to accommodate specific application requirements Saddle Mounts are ordered separate.

scoping Mast

Rohn Telescoping mast for supporting light duty antennas. All Telescoping mast are galvanized and come with hardware. The unique Rohn design features interior tube flanging combined with a double crimped exterior tube to produce a stronger and more stable joint than most common mast. Each section extends deeper into the lower tubes than most designs, adding still further to the stability of the mast. Order guy wire separately!

NEW 59138 1 EACH	Wireless Solutions VC-WB-24X22 1 Year	22 degree bend for 24" Ice Bridge.	85.00 15 6.82	85 83 81

Waveguide Bridge Kit

88353

ROHN offers single or double-wide self-supporting waveguide bridge assemblies support waveguide and transmission line. Bridges feature grip strut as the protect panel supported by an angular frame,all supported by two vertical 3-1/2" standar pipe.The elevation of the bridge is adjustable up to 12' above grade.The waveguid hanger angles feature eight 7/16" and nine 3/4" hole for hangers.

Part No. Qty/Uom	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T- T- T-
88353 1 EACH	Rohn Tower WGBS2410 1 Year	24" wide channel for supporting up to 24 runs of coax on three levels.	1,040.00 540 245.43	88 85 81

Waveguide Channel

62534

Waveguide channel provides support and protection for h zontal waveguide runs. Channels are formed of 11 gauge s and hot dipped galvanized after fabrication. Slots are all 7/ 16"x7/8" for 3/8" hardware, except center slots which are 16"x 2 1/2". Installation hardware must be purchased sepa

dge Covers for Solid Bridge

11971

Provide the highest level of protection from the elements with the Bridge Cover. The bridge cover is fitted over inverted solid waveguide bridge channel to completely enclose runs of coaxial cable and waveguide. The covers are formed of 11 guage steel and are hot-dip galvanized. All necessary attachment hardware is included.

o. m	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T-1($) T-2($) T-3($)

Waveguide Bridge Extension Kit

Permits 45 degree extension of waveguide bridge channel to accommodate bending radius of waveguide.

Part No. Qty/Uom	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T-1($) T-2($) T-3($)
68049 1 EACH	Wireless Solutions MT-F1133 3 Years	Includes all necessary attachment hardware.	51.00 40 18.18	49.98 49.47 48.96
15353 1 EACH	Microflect/Valmont B1133 2 Years	Includes eleven 3/8" x 1 1/4" bolts, nuts, lockwashers and flatwashers.	51.00 27 12.27	50.24 49.98 49.73

Corner Filler

Corner Fillers are used to provide ice protection for waveguide at 90 degree bends, or when a wider area of ice protection is needed over a waveguide entry.

Part No. Qty/Uom	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T-1($) T-2($) T-3($)
54835 1 EACH	Wireless Solutions MT-F505 3 Years	Includes all necessary attachment hardware.	41.00 15.3 6.95	40.18 39.77 39.36
40532 1 EACH	Microflect/Valmont B505 2 Years	Made of 11 gauge galvanized steel. Includes four 3/8" bolts, nuts and lockwashers.	41.00 15.3 6.95	40.39 40.18 39.98

Waveguide Bridge Splice Stiffener

The splice stiffener is designed to strengthen the joints between two sections of solid waveguide bridge channel.

Part No. Qty/Uom	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T-1($) T-2($) T-3($)
41621 1 EACH	Wireless Solutions MT-F1223 3 Years	One angle, measures 2" x 2" x 33" and uses 3/8" hardware. All necessary attachment hardware is included.	20.00 12 5.45	19.60 19.40 19.20
14104 1 EACH	Microflect/Valmont B1223 2 Years	Two angles per kit measuring 2" x 2" x 1/8" x 33". Hardware not included.	20.00 10 4.54	19.70 19.60 19.50

Grating Channel Splice

22091 476149

Straight Splice for Grated and Safety Grated Waveguide Bridge Channel. Allows 2 sections be connected to form a longer run. Support within 2' of the splice is recommended. All n sary attachment hardware included.

Part No. Qty/Uom	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T- T- T-
22091 1 EACH	Wireless Solutions MT-352 3 Years	Straight Splice for Grated Waveguide Bridge Channel. Kit of 2.	30.00 28.83 13.1	29 28 28
NEW 476149 1 EACH	Wireless Solutions WS-K400 3 Years	24" Straight Splice for Safety Grated Waveguide Bridge Channel. Sold individually.	24.50 7 3.18	24 23 23

Grating Section Splice

38034

Channel splice for Grating Channel and the splice must be used within 2 feet of the splice in order for the support of two chan Hot-dip galvanized.

Part No. Qty/Uom	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T- T- T-
38034 1 EACH	Microflect/Valmont B1108 2 Years	Channel splice for grating-type waveguide bridge. Use with 6" wide 64462 and 12855 sections. Hardware included.	12.00 4 1.82	11 11 11
24820 1 EACH	Microflect/Valmont B1109 2 Years	Channel splice for grating-type waveguide bridge. Use with 9" wide 51248 and 89641 sections. Hardware included.	15.00 5 2.27	14 14 14

Adjustable Grating Channel Splice

Adjustable channel splice for grating-type waveguide bri to 45 degree angle. Hardware included and Hot-dip galv nized.

Part No. Qty/Uom	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T- T- T-
49999 1 EACH	Microflect/Valmont B1064 2 Years	Adjustable channel splice for grating-type waveguide bridge. 0 to 45 degree angle. Use with 9" wide 51248 and 89641 sections. Hardware included.	28.00 6 2.73	27 27 27

Hinged Splice

36785

Adjustable hinged splice for grating -type waveguide and adjustable from 0 degree. Use with 6" or 9" wide channel. Hot-dip galvanized and all hardwa included.

Part No. Qty/Uom	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T- T- T-
36785 1 EACH	Microflect/Valmont B1267 2 Years	0 to 90 degree hinged splice for grating-type waveguide bridge. Use with 6" or 9" wide channel. Includes hardware.	72.00 4 1.82	70 70 70

-in Insert

178

Tap-In inserts are made to fit between the ribs of Grating Bridge Channels and are designed to hold trapeze kits is place.

o. m	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T-1($) T-2($) T-3($)
8 K	Microflect/Valmont B397 2 Years	Made of tough polyester material, tap-in inserts are threaded with a 3/8" hole and are tapped in between grating ribs. 5 per package.	26.00 1 0.45	25.61 25.48 25.35

eze Bridging Kits

12498

The Trapeze Kits provide secure support for coaxial cables in waveguide bridge applications. The Trapeze Kits extend 12" below the waveguide bridge via stainless steel threaded rods, allowing easy feeding to the entry panel.

o. m	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T-1($) T-2($) T-3($)
3 H	Wireless Solutions MT-357-12 3 Years	12" Wide Trapeze Holds Up to 7 Runs	22.50 3 1.36	22.05 21.83 21.60
5 H	Wireless Solutions WB-TK12D 3 Years	Two, 12" Wide Trapeze. Holds Up to 14 Cable Runs	35.00 5.8 2.64	34.30 33.95 33.60
1 H	Wireless Solutions MT-357-24 3 Years	24" Wide Trapeze Holds Up to 14 Runs	25.00 6 2.73	24.50 24.25 24.00
7 H	Wireless Solutions WB-TK24D 3 Years	Two, 24" Wide Trapeze. Each Holds up to 14 Cable Runs.	40.00 11.8 5.36	39.20 38.80 38.40

ical Z Bracket

Vertical Z -brackets offer a simplified way to support multiple cable runs under waveguide bridges and on flat surfaces such as ceilings, keeping the cable free from damage. Low profile, uses less space than cluster brackets or waveguide crosses. Pre-punched with 3/4" holes for snap in hangers and 7/16" holes for standard hangers. Galvanized for excellent corrosion resistance.

. m	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T-1($) T-2($) T-3($)
1 H	Wireless Solutions ZB-V12 3 Years	Vertical Z Bracket for 12 runs of cable.	17.50 4 1.82	17.33 17.07 16.80

eze Bridging Kits

69027 94206 42599

flect trapeze kits come in either a single, dual or triple level kit for use with 24" wide uide bridge. One side of the angle has 8 3/4" holes for snap-in's while the other side has " holes for cushions or butterfly hangers. Includes all needed threaded rod, flatwashers, ashers and nuts. Order waveguide channel separately.

39482 1 EACH	Microflect/Valmont B514 2 Years	40.5" long for use with 36" waveguide bridges. Use Canopy Adapter Sleeve.	23.00 10.8 4.91	22.66 22.54 22.43
72680 1 EACH	Microflect/Valmont B510 2 Years	Truss Support is used to support two 12" wide bridge channels. Included Pipe Sleeve allows for a 24" adjustment above the the height of the Pipe Column. All Hardware Included.	77.00 33 15	75.85 75.46 75.08

Pipe Leg Channel Support

483155

The pipe leg channel supports allow grated or solid waveguide bridge channel to be supported by round tower legs or other support members. The unique design allows a wide range of leg sizes to be accommodated by a single support. Versions are available to support either 12" or 24" wide channel. Supports are hot dipped galvanized and all required attachment hardware is included.

Waveguide Bridge Support Brackets

424047

Support Brackets allow grated and solid waveguide channel to b supported by pipe columns. The brackets are designed to side- mount to a standard 3.5"OD pipe column via the included U-bo assembly, providing the versatility to easily adjust the height of t waveguide bridge system in the field. The brackets are made fro hot dipped galvanized steel to ensure superior corrosion protec

Part No. Qty/Uom	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T-1 T-2 T-3

Canopy Support Bracket

79124

Canopies are used in a system when a wider area is needed over the buil entry due to the bending radius of the waveguide. Canopies can also be jo to make a continuous wide run to a tower.

Part No. Qty/Uom	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T- T- T-
79124 1 EACH	Microflect/Valmont B507 2 Years	Assembly hardware & clip angles are included. If attaching to a wall, 1/2" mounting hardware is required.	46.00 26.5 12.04	45 45 44

Pipe Columns

60484

Pipe Columns are all 3.5" O.D. at the top and will accept a variety of pipe heads, tr or canopy supports. When determining maximum height of the pipe columns, add of adjustment available on the pipe heads and trusses. All columns are hot dipped nized. Maximum spacing for pipe columns is 10'1" for waveguide channel and 20' f grating-type waveguide bridges.

Part No. Qty/Uom	Manufacturer Mfg. P/N Warranty	Description	List ($) Wt. (lbs) Wgt. (kg.)	T- T- T-

Light Duty Waveguide Supports

52497

The combination square rail makes an ideal support for light systems where ice is not a consideration. The upper half of the combination is used to attach it to B510 truss support. The recommended maximum span is 15 ft. between support points, based on a loading of 20 Lbs. per lineal foot. Distance between rails would be 18.5" center to center when using the B510 truss support. Rails are 1 5/8" square and spot welded back-to-back. Top slot is used to attach to pipe heads with 1/2" hardware & 1/2" spring nuts (B262). The lower slot is used to attach waveguide with 3/8" hardware and 3/8" spring nuts (B174).

Roof-Top Coax Bridge Kits

410158 53785 40571

Roof-Top Coax Bridge Kits provide support and protection for coax runs in roof-top app tions. Each 8' long bridge kit includes 3 PVC sleepers with 3/4" holes and a steel cover for tection. Straight Splices allow 2 sections to be connected together to form a longer run v Adjustable Splices interconnects 2 sections while creating up to a 45 Degree bend to acc modate the minimum bend radius of the coax. These Splices allow interconnections and b to fit virtually any roof-top layout. Order Splices from below selection.

p Kits for Cable Ladders

Attachment Kits allow Cable Ladders to be securely mounted to round and angle tower support members. Each kit includes 3/8" galvanized j-bolts which affix to the vertical rails of the cable ladder, and utilize clamping plates for attachment for tower members. Each Attachment Kit includes two complete attachments which mount to both rails of the cable ladder to accommodate a single tower cross-member. A minimum of one kit is required per 10' long Cable Ladder section, or two kits per 20' long section.

Qwikport Roof Cable Enrty System

48067

The Qwikport is a lightweight, seamless roof entry with 24 integral entry por One man can carry from elevator to rooftop. Seamless construction provides tection against leakage. The 24 four inch ports are part of the unit. Cut out ho for cable or use 4" rubber boots. 12 ports and a bus bar are located on oppo sides & top is removable.

- Comes complete with all installation hardware and tools except curbng and boots.

BTS Bases and Support Frames

41071

The BTS Support Frame supports an Ericsson Compact ra cabinet for ground or roof-top installations. Both ends of fi has four 4" diameter holes for routing coax and a solid cov plate is provided to close one end. Frames can be bolted together. Optional entry panels (79464 or 80185) allows th of rubber boots for water-tight entry.

nplete Wall Feed Through Package

Another Polyphaser innovation. Instead of the protectors grounding to a U-panel, as in the 3PB series, the protectors are grounded to either a upper or lower plate using copper strap. This method allows greater access to the protectors. Cable outer conductor is grounded at the entrance panel. Includes weather boots to handle 1/2" to 3 1/8" cables.

Waveguide Cushions

45202

Cushions are available to fit most sizes of coaxial cable and waveguide. They are easily attached to any tower or horizontal waveguide support. The clamp has a stop that allows a firm grip without distortion. Material is unaffected by sunlight, ozone or extremes in temperature. Includes clamp and clamp head.

Cable Hanger Blocks Systems [435-13]

Don't forget these important installation items

Wrenches.....page 1581
Wire Markers.....page 1751

Mini Dual Cable Support Blocks

Dual cable blocks substantially reduce system and installation cost by making efficient use of hardware facilitating easy-to-install, compact coax bundles. These durable weather resistant blocks are ideal for use where extreme temperature capability and UV stability is required. Each block holds two runs of cable. Mounting hardware is ordered separately.

ick On Hangers

Click-On Hangers are specifically designed to support HELIAX coaxial cable. They are stackable and provide a perfect fit that gives your telecommunications system a professional appearance, especially in confined spaces. Installation is achieved in just minutes and only requires 2 wrenches. Click On Hangers are made of tough, UV resistant material and set the standard for durability, installation simplicity and cost effectiveness.
